

in water tanks. During the 10-year term of the CCAA and ESP, the applicant proposes to maintain on its property the functional characteristic of fisher habitat on roughly 80 percent of the 10,000 acre polygons identified by the Service as having the highest likelihood of supporting a reproductive female fisher and her offspring. The implementation of the CCAA will be funded by SPI's general revenue.

The applicant proposes to continue with their normal forestry operations, which have been ongoing for several decades and are guided by a long-term management plan approved by the California Department of Forestry and Fire Protection under the California Forest Practice Rules (FPRs) at 14 CCR 913.1(a), 933.1(a), 953.1(a) (Option A plan). This demonstration of Maximum Sustained Production (MSP) of high-quality timber products per the FPRs specifies the amount of timber harvest that will occur over a 100-year planning horizon after accounting for constraints associated with protecting non-timber resources such as watershed, wildlife, fisheries quality, and aesthetic values. One of the conservation measures proposed in the CCAA is to maintain the harvest rate specified in the Option A plan. Under that rate of harvest SPI will keep approximately 50 percent (at least 700,000 acres) of their enrolled property in a mixed age condition. Harvest scheduling will also be constrained where necessary such that 43 of the 54 originally identified high quality fisher areas maintain the functional characteristics of fisher habitat at the landscape scale over the 10-year CCAA. In each timber harvesting unit, habitat elements such as large old trees, defective trees, snags, and hardwoods will be specifically retained and recruited as detailed in the CCAA. The implementation of these conservation measures will be monitored, and over time the effectiveness of these measures for providing functional fisher habitat will be evaluated in adaptive manner allowing for changes, if necessary to achieve the conservation goals.

#### National Environmental Policy Act Compliance

We provide this notice under section 10(c) of the Act and Service regulations for implementing NEPA. We have prepared a draft EA for the proposed action and have made it and the applicant's proposed CCAA available for public inspection (see **ADDRESSES**). NEPA requires that a range of reasonable alternatives, including the proposed action, be described. The draft

EA analyzes three alternatives, described below.

#### *Proposed Action (Preferred Alternative)*

We propose issuing an enhancement of survival permit to the applicant, who would implement the CCAA, described above. If we approve the permit, incidental take of fishers would be authorized during the applicant's forestry operations and support activities should the fisher become listed. With this alternative, incidental take would be reduced from the No Action and Stirling Management area alternative because under the CCAA SPI would be required to reduce the disturbance during the fisher breeding season, maintain large blocks of mixed age class forest, maintain functional landscapes for fishers, retain and recruit habitat elements that are important to fishers, and monitor the implementation and effectiveness of these measures for conserving fishers throughout their property, including the Stirling Management Area.

#### *No Action Alternative*

The draft EA includes a No Action alternative; the Service and SPI would not enter into the CCAA and the conservation measures would not be implemented. Under the No Action alternative, impacts to fishers would likely continue at the current rate. Under this alternative, SPI would continue with their ongoing operations guided by the California Forest Practice Rules, other local, State and Federal regulatory frameworks including the ESA.

#### *Excluding the SPI Stirling Management Area From the CCAA Alternative*

Under this alternative, SPI's 159,966-acre Stirling Management Area (SMA) would be excluded from the CCAA. In 2005, in response to concerns over the absence of fishers in portions of their historical occupied range, the Service and the California Department of Fish and Wildlife (CDFW) began considering translocation of fishers to reestablish fishers in historically occupied areas. The Service and SPI entered into a CCAA and the Service issued an ESP that would authorize SPI's take of fishers in the event the translocation was successful and if the fisher is listed. Between 2009 and 2011, 40 fishers were translocated to the SMA. The Stirling CCAA requires fewer conservation measures than the proposed CCAA and will expire on April 14, 2028. Under Alternative 3 (excluding the SMA from the proposed CCAA), the environmental impacts from SPI's forestry operations and support activities would be

identical to those under the Proposed Action; however, the SMA would be managed under the previous CCAA rather than the proposed CCAA.

#### Public Review

The Service invites the public to comment on the permit application, including the proposed CCAA and draft EA, during the public comment period (see **DATES**). If you wish to comment, you may submit your comments via one of the means listed in **ADDRESSES**. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

#### Next Steps

Issuance of an enhancement of survival permit is a Federal action subject to compliance with NEPA. We will evaluate the application, associated documents, and any public comments we receive to determine whether the application meets the requirements of NEPA regulations and section 10(a) of the Act. If we determine that those requirements are met, we will issue a permit to the applicant for the incidental take of fishers that becomes effective if fishers are listed. We will not make our final decision until after the 30-day public comment period ends.
