SUPPLEMENTARY INFORMATION:**General Information**

EPA is reissuing three final NPDES permits for discharges of stormwater from small MS4s to certain waters within the Commonwealth of Massachusetts. The three general permits are:

MAR041000—Traditional cities and towns

MAR042000—Non-traditional state, federal, county, and other publicly owned MS4s

MAR043000—Non-traditional transportation MS4s

While these are technically distinct permits, for convenience they have been grouped into a single document and this document refers to the “permit” in the singular. The final general permit, appendices and attachments, as well as response to comments on the draft permit and supplemental fact sheet information are available at http://www.epa.gov/region1/npdes/stormwater/MS4_MA.html.

The conditions in the general permit are established pursuant to Clean Water Act (CWA) section 402(p)(3)(iii) to ensure that pollutant discharges from small MS4s are reduced to the Maximum Extent Practicable (MEP), protect water quality, and satisfy the appropriate requirements of the CWA. Further information on the requirements of the permit related to MEP and water quality may be found in EPA’s Response to Comments document on the above Web site.

EPA issued a final general permit to address stormwater discharges from small MS4s in Massachusetts and New Hampshire on May 1, 2003. The 2003 general permit required small MS4 operators to develop and implement a Stormwater Management Program (SWMP) designed to control pollutants to the maximum extent practicable and protect water quality. This final general permit for Massachusetts MS4s builds on the requirements of the 2003 general permit. During 2010, EPA drafted two separate Small MS4 general permits to replace the 2003 Small MS4 permit for eligible operators located in Massachusetts; one for operators located in the North Coastal watershed and the other for those located in the Interstate, Merrimack and South Coastal watersheds. Based on comments and

information gathered while developing responses, EPA modified the initial draft general permits and issued a draft permit covering all eligible operators in Massachusetts pursuant to 40 CFR 124.6. EPA took public comments on this draft permit from September 30, 2014 to February 27, 2015. EPA received over 150 unique written letters and oral comments on the draft permit. Concurrent with the release of the final permit and supplemental materials EPA will make available a Response to Comments received on the draft permit. The Response to Comments will be available on the EPA Web site listed above. Changes to the permit resulting from public comments include, but are not limited to: Reduction of certain reporting requirements and metrics, reorganization of certain requirements for clarity, and extension of deadlines for certain required tasks and reports within the permit.

Obtaining Authorization

In order for a small MS4 operator to obtain authorization to discharge, it must submit a complete and accurate NOI containing the information in Appendix E of the general permit. The NOI must be submitted on or before September 29, 2017 (90 days from the effective date of the final permit). A small MS4 operator must meet the eligibility requirements of the general permit found in Part 1.2 and Part 1.9 prior to submission of its NOI. A small MS4 operator will be authorized to discharge under the permit upon receipt of written notice from EPA following a public notice of the submitted NOI. EPA will authorize the discharge, request additional information, or require the small MS4 to apply for an alternative permit or an individual permit. NOIs may be submitted electronically to EPA at stormwater.reports@epa.gov or sent via regular or overnight mail to: United States Environmental Protection Agency, Stormwater and Construction Permits Section OEP 06–1, 5 Post Office Square—Suite 100, Boston, Massachusetts 02109–3912. A copy of the NOI shall also be sent to MassDEP at the following address: Massachusetts Department of Environmental Protection, One Winter Street—5th Floor, Boston, Massachusetts 02108 ATTN: Frederick Civian, Stormwater Coordinator.

Other Legal Requirements

In accordance with the Endangered Species Act (ESA), EPA has updated the provisions and necessary actions and documentation related to potential impacts to endangered species from discharges and related actions under the

Massachusetts small MS4 general permit. EPA has obtained concurrence from the appropriate federal services (U.S. Fish and Wildlife Service and National Marine Fisheries Service) regarding the requirements of this general permit.

In accordance with the National Historic Preservation Act, EPA has established provisions and documentation requirements for operators seeking coverage under the Massachusetts small MS4 general permit to ensure that discharges or actions taken under this permit will not adversely affect historic properties and places.

Authority: This action is being taken under the Clean Water Act, 33 U.S.C. 1251 *et seq.*

Dated: April 4, 2016.
