Needs and Uses: December 18, 2015, the Commission released a Third Report and Order and Fourth Notice of Proposed Rulemaking, In the Matter of Amendment of Parts 73 and 74 of the Commission's Rules to Establish Rules for Digital Low Power Television and Television Translator Stations, MB Docket No. 03–185, FCC 15–175. This document contains final rules and policies for a digital-to-digital replacement digital replacement translator to permit full power television stations to continue to provide service to viewers that may have otherwise lost service as a result of the station being “repacked” in the Commission's incentive auction process.

47 CFR 74.787(a)(5)(v) states that an application for a digital to digital replacement translator may be filed by a full power television station that can demonstrate that a portion of its digital service area will not be served by its full, post-incentive auction digital facilities. The service area of the replacement translator shall be limited to only a demonstrated loss area.

However, an applicant for a replacement digital television translator may propose a de minimis expansion of its full power pre-transition analog service area upon demonstrating that it is necessary to replace its post-incentive auction digital loss area.

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information. Certain information collected regarding international

coordination of satellite systems is not routinely available for public inspection pursuant to 5 U.S.C. 552(b) and 47 CFR 0.457(d)(vii).

Needs and Uses: On December 17, 2015, the Commission released a Second Report and Order, FCC 15–167, titled, “In the Comprehensive Review of Licensing and Operating Rules for Satellite Services.” In this Report and Order, the Commission adopted comprehensive changes to 47 CFR part 25, which governs licensing and operation of space stations and earth stations for the provision of satellite communication services. Many of the amendments are substantive changes intended to give licensees greater operational flexibility.

The information collection requirements in this collection are needed to determine the technical, legal, and other qualifications of applicants and licensees to operate a radio station and to determine whether grant of an authorization serves the public interest, convenience and necessity. Without such information, the Commission could not determine whether to permit respondents to provide communications services in the United States. Therefore, the Commission would not be able to fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended, and the obligations imposed on parties to the World Trade Organization Basic Telecom Agreement.

OMB Control Number: 3060–0937.

Needs and Uses: On November 29, 1999, the Community Broadcasters Protection Act of 1999 (CBPA), Public Law 106–113, 113 Stat. Appendix I at pp. 1501A–594–1501A–598 (1999), codified at 47 U.S.C. 336(f), was enacted. That legislation provided that a low power television (LPTV) licensee should be permitted to convert the secondary status of its station to the new Class A status, provided it can satisfy certain statutorily-established criteria. The CBPA directs that Class A licensees be subject to the same license terms and renewal standards as full-power television licenses and that Class A licensees be accorded primary status as television broadcasters as long as they continue to meet the requirements set forth in the statute for a qualifying low power station.

The CBPA sets out certain certification and application procedures for LPTV licensees seeking Class A designation, prescribes the criteria LPTV licensees must meet to be eligible for Class A licenses, and outlines the interference protection Class A applicants must provide to analog, digital, LPTV and TV translator stations.

The CBPA directs that Class A stations must comply with the operating requirements for full-service television broadcast stations. Therefore, beginning on the date of its application for a Class A license and thereafter, a station must be “in compliance” with the Commission’s operating rules for full-service television stations, contained in 47 CFR part 73.
