SUPPLEMENTARY INFORMATION:

I. Background

In 1994, President Clinton signed Executive Order 12898, *Federal Actions to Address Environmental Justice in Minority Populations and Low-income Populations*, which outlined a mandate for Federal agencies to “make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations in the United States and its territories and possessions, the District of Columbia, the Commonwealth of Puerto Rico, and the Commonwealth of the Mariana Islands.” Environmental justice is often defined as meeting the needs of underserved communities by reducing disparate environmental burdens, removing barriers to participation in decision making, and increasing access to environmental benefits that help make all communities safe, vibrant, and healthy places to live and work.

In August 2011, the Department joined with other Federal agencies in the signing of a *Memorandum of Understanding on Environmental Justice and Executive Order 12898* (MOU). This MOU reaffirmed the Federal government's commitment to

environmental justice. Provisions of the MOU call on each Federal agency to review and update existing environmental justice strategic plans where applicable and as appropriate. At that time, the Department published a 2012–2017 Environmental Strategic Plan to meet this provision to update Federal agency strategic plans.

The Department's 2012–2017 Environmental Justice Strategic Plan set forth five major goals that continue to guide the Department in its pursuit of environmental justice:

(1) Ensure responsible officials are aware of the provisions of EO 12898 and are able to identify and amend programs, policies, and activities under their purview that may have disproportionately high and adverse human health or environmental effects on minority, low-income, or tribal populations;

(2) Ensure minority, low-income, and tribal populations are provided with the opportunity to engage in meaningful involvement in the Department's decision making processes;

(3) The Department will, on its own or in collaboration with partners, identify and address environmental impacts that may result in disproportionately high and adverse human health or environmental effects on minority, low-income, or tribal populations;

(4) Use existing grant programs, training, and educational opportunities as available to aid and empower minority, low-income, and tribal populations in their efforts to build and sustain environmentally and economically sound communities; and

(5) Integrate the Department's environmental justice strategies with its Title VI of the Civil Rights Act enforcement responsibilities to improve efficiencies while preserving the integrity of Title VI and environmental justice activities.

In 2015, the Department began the process to update the Department's 2012–2017 Environmental Justice Strategic Plan by evaluating actions the Department could implement to meet the five goals. The update to the strategic plan is based on input and review by the Department's bureaus and offices and meets the goal of the 2011 MOU to periodically evaluate and update strategic plans.
