Abstract: Owners and operators of affected facilities are required to comply with reporting and record-keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as for the specific requirements at 40 CFR part 63, subpart TTTTT. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Primary Magnesium Refining Facilities
Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart TTTTT).

Estimated number of respondents: 1 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 611 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$62,700 (per year), which includes \$1,200 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden hours in this ICR from the previous ICR because the regulations have not changed, and are not expected to change, in the next three years. There is, however, a small adjustment increase in the estimated labor costs as due to an update in labor rates.

Acting-Director, Collection Strategies Division.

1,800 (total).

Frequency of response: Initially and annually.

Total estimated burden: 64,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$6,490,000 (per year), which includes \$37,200 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent labor hours and cost in this ICR compared to the previous ICR. This is not due to program changes. The increase occurred because this ICR assumes all existing respondents will take some time each year to re-familiarize with the regulatory requirements. Additionally, there is a small decrease of \$36 in the estimated O&M cost due to rounding. This ICR rounds all calculated burden and costs to three significant digits. There is no change in the methodology or assumption used to calculate O&M cost.
