POLICY JUSTIFICATION

Australia—AIM–120D Advanced Medium-Range Air-to-Air Missiles:

The Government of Australia requested a possible sale of:

Major Defense Equipment (MDE):

Up to 450 Advanced Medium-Range Air-to-Air Missiles (AIM–120D) Up to 34 AIM–120D Air Vehicles

Instrumented (AAVI)

Up to 6 Instrumented Test Vehicles (ITVs)

Up to 10 spare AIM–120 Guidance Sections (GSs) This request also includes the following Non-MDE: Containers, weapon system support equipment, support and test equipment, site survey, transportation, repair and return warranties, spare and repair parts, publications and technical data, maintenance, personnel training, and training equipment, U.S. Government and contractor representative engineering, logistics, and technical support services, and other related elements of logistics support.

The total estimated value of MDE is \$1.08 billion. The total overall estimated value is \$1.22 billion.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a strategic partner and major contributor to political stability, security, and economic development in the Pacific region and globally.

This proposed sale is in support of the Royal Australian Air Force's (RAAF) F/A–18, E/A–18G, and F–35 aircraft. This proposed sale will provide the RAAF additional air-to-air intercept capability and increase interoperability with the U.S. Air Force. Australia will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment will not alter the basic military balance

in the region.

The principal contractor for production is Raytheon in Tucson, Arizona. The principal contractor for integration is unknown and will be determined during contract negotiations. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any additional U.S. or contractor representatives to Australia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 16-19

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology:
1. The AIM-120D AMRAAM
hardware, including the missile
guidance section, is classified
CONFIDENTIAL. State-of-the-art
technology is used in the missile to
provide it with unique beyond-visualrange capability. The increase in
capability from the AIM-120C-7 to
AIM-120D consists of a two-way data

link, a more accurate navigation unit, improved High-Angle Off-Boresight (HOBS) capability, and enhanced aircraft to missile position handoff.

2. AIM-120D features a target detection device with embedded electronic countermeasures, an electronics unit within the guidance section that performs all radar signal processing, mid-course and terminal guidance, flight control, target detection, and warhead burst point determination.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. Åll defense articles and services listed in this transmittal have been authorized for release and export to the Government of Australia.
