Background and Purpose

On December 18, 2015, the President signed into law the Cybersecurity Act of 2015 as a part of the FY16 omnibus spending bill. Both Congress and the White House were active on the issue of cybersecurity during 2015, with multiple bills passed in each chamber. The resulting law included in the omnibus spending legislation reflects a reconciliation of the cybersecurity bills passed in the House and Senate in 2015.

Title I, the Cybersecurity Information Sharing Act (CISA), authorizes companies to voluntarily share cyber threat indicators and defensive measures with the Federal Government, State, Local, Tribal, and Territorial (SLTT) entities, and other private sector entities through a capability and process established by DHS. The law also:

- Provides liability protection to private sector entities for information shared in accordance with the law;
- Directs DHS to share private sector cyber threat indicators and defensive measures in an automated and real-time manner with Federal departments and agencies for cybersecurity purposes;
- Establishes measures to ensure that cybersecurity information received, retained, or shared by the DHS mechanism will not violate the privacy or civil liberties of individuals, under procedures jointly drafted by the Department of Justice and DHS;
- Protects shared information from public disclosure; and
- Sunsets the provisions for these information sharing measures in 10 years.

The CISA establishes an additional statutory basis for the Department's information sharing efforts with the Automated Indicator Sharing (AIS) initiative, which enables real-time sharing of cyber threat indicators between DHS and stakeholders in the public and private sectors. The DHS real-time sharing process (and the web form and email processes) for cyber threat indicator and defensive measure sharing do not replace pre-existing

cyber incident and cyber-crime reporting.

The purpose of the public workshop is to engage and educate stakeholders and the general public on CISA implementation and related issues such as:

- What is CISA?
- What is the Automated Indicator Sharing (AIS) initiative?
- What are the privacy concerns around CISA and how are privacy protections built into information sharing?
- What is the benefit of participating in an Information Sharing and Analysis Organization (ISAO) as it pertains to CISA?
- How does an organization (Federal or non-federal) connect and participate in AIS?

The event will consist of a combination of keynote addresses, presentations, and panel discussions, each of which will provide the opportunity for audience members to ask questions.
