k. *Description of Request:* The applicant proposes to construct two new diversion dams, each approximately 30 feet high and 250 feet wide, on eastern and western tributary branches of the West Fork of Hidden Basin Creek. Surface water from the diversion dam on the eastern tributary would flow through a half-mile-long, 5-foot-diameter underground pipe to the diversion dam on the western tributary. From there, the combined flow would travel by gravity through a 1.2-mile-long, 12-foot-diameter tunnel through the mountainous uplands of Kodiak Island to the Terror Lake reservoir. The applicant also proposes to construct a 4-mile-long spur road off of an existing road to provide access for constructing and maintaining the new diversions. The proposal would not change the authorized installed capacity of the project; however, it is expected to increase the average annual generation by 33,000 megawatt-hours. An additional 160 acres of land would be added to the project boundary. Most of the new facilities would be constructed on lands owned by the State of Alaska and on federal land already occupied by the project; however, a portion of the 1.2-mile-long tunnel would cross an additional 2 acres of federal land administered by the Kodiak National Wildlife Refuge outside of the project boundary.
