fisheries in the Columbia River Basin, including designated off-channel sites, which are intended to: (1) Ensure fair sharing of harvestable fish between tribal and non-tribal fisheries in accordance with Treaty fishing rights standards and U.S. v. Oregon, and (2) be responsive to the needs of ESA-listed species. While the agreement includes a hatchery production component, the NEPA analysis of hatchery production within the action area has been completed, or will be supplemented, in a separate EIS that will be incorporated by reference in this EIS. Consequently, the Proposed Action in this EIS analysis focuses on harvest. Construction of new hatchery facilities to mitigate impacts to fisheries from The Dalles Dam and John Day Dam hydropower operations is being analyzed by the U.S. Army Corps of Engineers in a separate analysis, which will also be incorporated by reference into this analysis.

Environmental Impact Statement

NEPA (42 U.S.C. § 4321 et seq.) requires that Federal agencies conduct an environmental analysis of their Proposed Actions to determine if the actions may significantly affect the human environment. The Services have determined that an EIS should be prepared under NEPA for the purpose of informing the Services' proposed signing of the new agreement. The information and analysis in the EIS will help to inform the subsequent ESA Section 7 consultation on the new agreement. The Services will prepare the EIS as joint lead agencies (40 CFR §§ 1501.5, 1508.16) in consultation with the Treaty Tribes pursuant to the Federal trust responsibility, Secretarial Order 3206, and Executive Order 13175. We will prepare an EIS in accordance with NEPA requirements, as amended (40 U.S. C. § 4321 et seq.); NEPA implementing regulations (40 CFR §§ 1500-1508); and other Federal laws, regulations, and policies.

The Services' purpose and need for the Proposed Action is three-fold: (1) To meet the Federal government's tribal treaty rights and trust and fiduciary responsibilities; (2) to support fishing opportunities to the states of Oregon, Washington, and Idaho, and the tribes; and (3) to work collaboratively with comanagers to protect and conserve ESA-listed and non-listed species.

Development of Initial Alternatives

The Services have preliminarily identified the following six alternatives for the public to consider. The preferred alternative will be developed to reflect a policy direction that would be

compatible with the Purpose and Need indicated above.

No-action Alternative (status quo): Under this alternative, the Services would not sign a new agreement, and the parties would continue to manage salmonid fisheries in the Columbia River consistent with the terms of the 2008–2017 agreement. A No-action Alternative is required in the full range of analyzed alternatives.

Abundance-based Management Alternative: Under this alternative, the Services would sign a new agreement with the other parties, and salmonid fisheries in the Columbia River would be managed under an abundance-based management framework.

Fixed Exploitation Rate Management Alternative: Under this alternative, the Services would sign a new agreement with the other parties, and salmonid fisheries in the Columbia River would be managed under a fixed exploitation rate management framework.

Escapement-based Management Alternative: Under this alternative, the Services would sign a new agreement with the other parties, and salmonid fisheries in the Columbia River would be managed under an escapement-based management framework.

Fixed Effort-based Management Alternative: Under this alternative, the Services would sign a new agreement with the other parties, and salmonid fisheries in the Columbia River would be managed under a fixed effort management framework.

No Fisheries Alternative: Under this alternative, the Services would sign a new agreement with the other parties; however, the parties would decide that salmonid fisheries would not be allowed in the Columbia River. Although this alternative does not meet the purpose and need for the Proposed Action, it is included to provide a full range of alternatives for analysis.

Request for Comments

The Services request data, comments, pertinent information, or suggestions from the public, other concerned governmental agencies, the scientific community, tribes, the business community, or any other interested party regarding the Proposed Action discussed in this notice. We will consider all comments we receive in complying with the requirements of NEPA. We particularly seek specific comments concerning:

(1) The direct, indirect, and cumulative effects that implementation of any reasonable alternative could have on endangered and threatened species, and other non-ESA-listed species and their habitats;

- (2) Other reasonable alternatives (in addition to the initial alternatives presented in this notice), and their associated effects;
- (3) Measures that would minimize and mitigate potentially adverse effects of the proposed actions;

(4) Other plans or projects that might be relevant to this project.

The EIS will analyze the effects that the various alternatives would have on salmon and steelhead and other fish species in the Columbia River Basin as well as the other aspects of the human environment, including but not limited to, water quality, habitat, wildlife (ESA-listed and non-ESA-listed), vegetation, socioeconomics (including fishery dependent communities and culture and economic impacts), environmental justice, cultural resources, transportation, and the cumulative impacts of the alternatives.

Authority: 42 U.S.C. 4321 et seq.

Dated: June 27, 2016.

Angela Somma,

Chief, Endangered Species Division, National Marine Fisheries Service, Protected Resources.

BILLING CODE 3510-22-P; 4333-15-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE700

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of final determination and discussion of underlying biological analysis.

SUMMARY: NMFS has evaluated three Resource Management Plans (RMPs) submitted to NMFS pursuant to the limitation on take prohibitions for actions conducted under Limit 6 of the 4(d) Rule for salmon and steelhead promulgated under the Endangered Species Act (ESA). The RMPs specify the propagation of three species of salmon in the Dungeness River watershed of Washington State. This document serves to notify the public that NMFS, by delegated authority from the Secretary of Commerce, has

determined pursuant to Limit 6 of the ESA 4(d) Rule for salmon and steelhead that implementing and enforcing the plans will not appreciably reduce the likelihood of survival and recovery of the Puget Sound Chinook salmon and Puget Sound steelhead.

DATES: The final determination on the take limit was made on June 10, 2016.

ADDRESSES: Written responses to the determination should be sent to NMFS Sustainable Fisheries Division, 510 Desmond Dr., Suite 103, Lacey, WA 98503.

FOR FURTHER INFORMATION CONTACT: Tim Tynan at (360) 753–9579 or email: tim.tynan@noaa.gov.

SUPPLEMENTARY INFORMATION:

ESA-Listed Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*): Threatened, Puget Sound, naturally produced and artificially propagated.

Steelhead (*O. mykiss*): Threatened, Puget Sound, naturally produced and artificially propagated.

Chum salmon (*O. keta*): Threatened, naturally produced and artificially propagated Hood Canal summer-run.

Background

The Washington Department of Fish and Wildlife (WDFW) and the Jamestown S'Klallam Tribe have submitted to NMFS RMPs for three jointly operated hatchery programs in the Dungeness River basin. The plans were submitted in January 2013, pursuant to limit 6 of the 4(d) Rule for the listed Puget Sound Chinook Salmon evolutionarily significant unit (ESU) and listed Puget Sound Steelhead distinct population segment (DPS). The plans reflect refinements of existing plans provided previously and evaluated pursuant to the 4(d) Rule. The hatchery programs release ESA-listed Chinook salmon and non-listed coho and fall-run pink salmon into the Dungeness River watershed. All three programs release fish native to the Dungeness River basin. All of the programs are currently operating.

As required by § 223.203(b)(6) of the ESA 4(d) rule, NMFS must determine pursuant to 50 CFR 223.209 and pursuant to the government-to-government processes therein whether the three plans for Dungeness River salmon hatchery programs would appreciably reduce the likelihood of survival and recovery of the Puget Sound Chinook Salmon ESU or Puget Sound Steelhead DPS. NMFS must take comments on how the plans address the

criteria in § 223.203(b)(5) in making that determination.

Discussion of the Biological Analysis Underlying the Determination

The hatchery activities described in the three RMPs are intended to conserve native, listed Dungeness River Chinook salmon and non-listed fall-run pink salmon populations, and provide coho salmon for harvest in tribal and non-Indian fisheries in the basin. The Chinook and pink salmon programs are designed to preserve, and bolster the natural spawning abundance of, the native Dungeness River populations of the species. The Chinook salmon stock released through the Dungeness River Hatchery Spring Chinook salmon program is included as part of the listed Puget Sound Chinook Salmon ESU. The **Dungeness River Hatchery spring** Chinook program would assist in the recovery of the listed native Dungeness Chinook salmon population. The coho salmon program is operated for harvest augmentation purposes, using broodstock derived from the native, non-listed Dungeness River coho salmon population.

The three programs would be operated in such a way as to minimize potential risks to listed natural-origin Dungeness River Chinook salmon, summer chum salmon, and steelhead populations, including interactions between hatchery and natural fish that may lead to adverse genetic effects and competition and predation. The proposed hatchery programs are consistent with the Dungeness River chapter of the Shared Strategy for Puget Sound (SSPS 2005; Ruckelshaus et al. 2005) and the Hood Canal Summer Chum Plan (HCCC 2005). These recovery plans were approved by NMFS to protect and restore listed Chinook and summer chum salmon populations across their range in Puget Sound (NMFS 2006; NMFS 2007).

As part of the proposed hatchery programs, monitoring and evaluation would be implemented to assess their performance in meeting population conservation or harvest augmentation objectives, and their effects on ESAlisted natural-origin Chinook salmon, summer chum salmon, and steelhead. Information gained through monitoring and evaluation will be used to assess whether the impacts of the programs on listed fish are as expected. Review of monitoring and evaluation results by NMFS and the co-managers will occur annually to evaluate whether assumptions regarding RMP effects and analysis remain valid, and whether the

objectives of the RMPs are being accomplished.

The RMPs include provisions for annual reports that will assess compliance with performance standards established through the RMPs.
Reporting and inclusion of new information derived from RMP research, monitoring, and evaluation activities provides assurance that performance standards will be achieved in future seasons. NMFS' evaluation is available on the West Coast Region Web site at http://

www.westcoast.fisheries.noaa.gov.

Summary of Comments Received in Response to the Proposed Evaluation and Pending Determination

NMFS published notice of its proposed evaluation and pending determination on the plans for public review and comment on February 20, 2015 (80 FR 9260). The proposed evaluation and pending determination and an associated draft environmental assessment were available for public review and comment for 30 days.

During the public comment period, NMFS received two comment letters on the draft environmental assessment. None of the comments raised issues that required substantive modification of the environmental assessment. The comments and NMFS' detailed responses are available on the West Coast Region Web site, as an appendix to the environmental assessment. Based on its evaluation and recommended determination and taking into account the public comments, NMFS issued its final determination on the Dungeness River salmon hatchery plans.

Authority

Under section 4 of the ESA, the Secretary of Commerce is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000) specifies categories of activities that contribute to the conservation of listed salmonids and sets out the criteria for such activities. The rule further provides that the prohibitions of paragraph (a) of the rule do not apply to actions undertaken in compliance with a RMP developed jointly by a state and a tribe and determined by NMFS to be in accordance with the salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000).

Dated: June 28, 2016.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

RIN 0648-XE703

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public workshop.

SUMMARY: The North Pacific Fishery Management Council's Stock Structure and Spatial Management public workshop will meet July 21, 2016.

DATES: The public workshop will be held on Thursday, July 21, 2016, from 1 p.m. to 5 p.m.

ADDRESSES: The public workshop will be held at the Alaska Fishery Science Center, 4600 Sand Point Way NE., Building 4, Seattle, WA 98115.

Council address: North Pacific Fishery Management Council, 605 W. 4th Ave., Suite 306, Anchorage, AK 99501–2252; telephone (907) 271–2809.

FOR FURTHER INFORMATION CONTACT: Diana Stram, Council staff; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION:

Agenda

Thursday, July 21, 2016

The Council will be hosting a public workshop to discuss stock structure and spatial management with a specific focus on identifying additional tools to manage the Bearing Sea Aleutian Island Blackspotted/Rougheye rockfish complex.

The Agenda is subject to change, and the latest version will be posted, at http://www.npfmc.org/.

Special Accommodations

The public workshop is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason, at (907) 271–2809, at least 7 working days prior to the meeting date.

Authority: 16 U.S.C. 1801 et seq.

Dated: June 28, 2016.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service. [FR Doc. 2016–15656 Filed 6–30–16; 8:45 am]

BILLING CODE 3510-22-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and deletions from the Procurement List.

SUMMARY: This action adds products and services to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products and a service from the Procurement List previously furnished by such agencies.

DATES: Effective Date: 7/31/2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT:

Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov*.

SUPPLEMENTARY INFORMATION:

Additions

On 5/20/2016 (81 FR 31917–31918) and 5/27/2016 (81 FR 33665–33666), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and services and impact of the additions on the current or most recent contractors, the Committee has determined that the products and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

- 2. The action will result in authorizing small entities to furnish the products and services to the Government.
- 3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products and services are added to the Procurement List:

Products

NSN(s)—Product Name(s): MR 10738— Holder, Pot Lid and Utensil, Includes Shipper 20738

Mandatory for: The requirements of military commissaries and exchanges in accordance with the Code of Federal Regulations, Chapter 51, 51–6.4

Mandatory Source(s) of Supply: Winston-Salem Industries for the Blind, Inc., Winston-Salem, NC

Contracting Activity: Defense Commissary Agency

Distribution: C-List

NSN(s)—Product Name(s): 6135–00–985–7846—Battery, Non-rechargeable, C, Alkaline

Mandatory for: Total Government Requirement

Mandatory Source(s) of Supply: Eastern Carolina Vocational Center, Inc., Greenville, NC

Contracting Activity: Defense Logistics Agency Land and Maritime, Columbus, OH

Distribution: A-List

Services

Service Type: Contractor Operated Parts Store (COPARS)

Mandatory for: U.S. Marine Corps, Motor Transport Department, Marine Corps Air Station, Building 160, Cherry Point, NC

Mandatory Source(s) of Supply: Eastern Carolina Vocational Center, Inc., Greenville, NC

Contracting Activity: Dept of the Navy, Commanding General, Camp Lejeune, NC

Service Type: Base Supply Center Mandatory for: Defense Health Agency, Defense Health Headquarters, 7700 Arlington Boulevard, Falls Church, VA Mandatory Source(s) of Supply: Virginia Industries for the Blind, Charlottesville,

Contracting Activity: Defense Health Agency (DHA), Defense Health Agency—Falls Church, Falls Church, VA

Deletions

On 5/27/2016 (81 FR 33665–33666), the Committee for Purchase From
