SUPPLEMENTARY INFORMATION: The Government Performance and Results Act of 1993 (GPRA) requires agencies to prepare strategic plans, annual performance plans and annual performance reports with measurable performance indicators to address the policy, budgeting and oversight needs of both Congress and agency leaders, partners/stakeholders, and program managers. In 2010, Congress passed the GPRA Modernization Act of 2010, which further requires a leadership-driven governance model with emphasis on quarterly reviews and transparency. The GPRA Modernization Act requires agencies to set priority goals linked to longer-term Agency strategic goals. Part 6 of Office of Management and Budget (OMB) Circular A-11 provides additional guidance and requirements for federal agencies to implement these laws.

The *NCUA Draft Strategic Plan 2017-2021* is issued pursuant to the GPRA, the GPRA Modernization Act, and OMB Circular A-11.

It highlights the agency's three strategic goals and supporting strategic objectives, which reflect the outcome or greater impact of the broader strategic goals. The three strategic goals for 2017-2021 are to:

- Ensure a Safe and Sound Credit Union System.
- Promote Consumer Protection and Financial Literacy.
- Cultivate an Inclusive, Collaborative Workplace at NCUA that Maximizes Productivity and Enhances Impact.

II. Discussion

The NRC is issuing draft NUREG/CR-7209, "A Compendium of Spent Fuel Transportation Package Response Analyses to Severe Fire Accident Scenarios." This report summarizes studies of truck and rail transport accidents involving fires, relative to regulatory requirements for shipment of commercial spent nuclear fuel (SNF). The fire accident scenarios were based on the most severe historical railway and roadway fires in terms of their potential impact on SNF containers. The accident scenarios that were analyzed include one railway tunnel fire, two roadway tunnel fires, and one roadway enclosed overpass fire. The combined summary of this work demonstrates that the current NRC regulations and packaging standards provide a high degree of protection to the public health and safety against release of radioactive material in real-world transportation accidents, were such events to involve SNF containers.

The purpose of this notice is to provide the public with an opportunity to review and provide comments on draft NUREG/CR-7209. Any comments received will be considered in the final version or subsequent revisions of the draft NUREG/CR.

Dated at Rockville, Maryland, this 21 day of January, 2016.

For the Nuclear Regulatory Commission.

Christian Araguas,

Chief, Containment, Structural, and Thermal Branch, Division of Spent Fuel Management, Office of Nuclear Materials Safety and Safeguards.
