This proposed sale will contribute to the foreign policy and national security of the United States by increasing Chile's ability to contribute to regional security and promoting interoperability with the U.S. forces. The sale will provide upgraded air defense capabilities on Chile's type 23 frigates. The proposed sale improves Chile's capability to deter regional threats and strengthen its homeland defense. Chile will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Raytheon Missile Systems, Tucson, Arizona, BAE Systems, Aberdeen, South Dakota, and Lockheed Martin, Bethesda, MD. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any

additional U.S. Government or contractor representatives to Chile.

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The sale of Evolved Seasparrow missiles (ESSM) under this proposed FMS case will result in the transfer of classified missile equipment to Chile. Both classified and unclassified defense equipment and technical data will be transferred. The missile includes the guidance section, warhead section, transition section, propulsion section, control section and Thrust Vector Control (TVC), of which the guidance section and transition section are classified CONFIDENTIAL. Standard missile documentation to be provided under this FMS case will include:

- a. Parametric documents classified CONFIDENTIAL.
- b. Missile Handling/Maintenance Procedures.
- c. General Performance Data classified CONFIDENTIAL.
- d. Firing Guidance classified CONFIDENTIAL.
- e. Dynamics Information classified CONFIDENTIAL.

2. The MK 41 Vertical Launching Systems (VLS) is a fixed, vertical, multi-missile launching system with the capability to store and launch multiple missile variants depending on the warfighting mission. MK 41 VLS is a modular, below-deck configuration with each module consisting of 8 missile cells with an associated gas management and deluge system. The highest classification of the hardware to be exported is UNCLASSIFIED. The highest classification of the technical documentation to be exported is UNCLASSIFIED. The highest classification of software to be exported is CONFIDENTIAL.

3. The proposed sale of ESSM under this FMS case will result in the transfer of sensitive technological information and or restricted information contained in the missile guidance section. Certain operating frequencies and performance characteristics are classified SECRET because they could be used to develop tactics and/or countermeasures to reduce or defeat missile effectiveness.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software

elements, primarily performance characteristics, engagement algorithms, and transmitter specific frequencies, the information could be used to develop countermeasures that might reduce weapon system effectiveness.

5. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

6. All defense articles and services listed in this transmittal have been authorized for release and export to Chile.
