k. *Description of Proceeding:* The exemptee is in violation of Standard Article 1 of the exemption, issued on December 1, 1981 (17 FERC ¶ 62,321), and the Commission's regulations at 18 CFR 4.106. Article 1 provides, among other things, that the Commission reserves the right to revoke an exemption if any term or condition of the exemption is violated.

The exemptee's failure to operate and maintain the project as authorized by its exemption is a violation of Standard Article 1. Commission records indicate that the project has not been operated since 1998. The current exemptee acquired the project in February 2009 and has been unable to restore project operation. On December 19, 2013, the exemptee filed a plan and schedule to restore project operation, which Commission staff approved with the requirement that the exemptee file quarterly progress reports starting October 1, 2014. The exemptee did not file the first progress report. By letter on December 19, 2014, Commission staff requested that the exemptee file the overdue progress report. In response, on January 9, 2015, the exemptee filed a

request for an extension of time stating it was unable to move forward with the approved plan and schedule and needed more time to reevaluate and formulate a plan of action. By telephone on March 12, 2015, Commission staff contacted the exemptee to inquire about the non-operational status of the project. In response, the exemptee reiterated its need for additional time and stated it was looking for a buyer for the project. By letter on April 15, 2016, Commission staff again requested that the exemptee file a plan and schedule to restore project operation. In addition, Commission staff informed the exemptee that it was non-compliant with the exemption and that failure to maintain and operate the project as authorized would result in termination of the exemption by the Commission. On April 27, 2016, the exemptee filed a response stating the project was still for sale, but did not file a plan and schedule or any other information regarding its efforts to restore project operation.

All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, protests, or motions to intervene should relate to project works which are the subject of the implied surrender. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.
