

(c) Cooper has contacted Computerized Information and Management Services, Inc. (CIMS), a third-party vendor that collects and provides tire registration cards to Cooper, so that tire registration cards will not be rejected solely due to improper plant code information.

Cooper also noted that while the subject tires are mislabeled on the outboard side, they meet all other performance requirements of the applicable standard. The company observed that plant code information has no bearing on the performance or operation of a tire and does not create a safety concern to either the operator of the vehicle on which the tires are mounter of the safety of personnel in the tire repair, retread and recycle industry. Cooper also stated that on April 22, 2016 the incorrect mold that caused the stamping error was removed from production and replaced with a corrected plug, thereby eliminating the problem in future production.

Please refer to Cooper's petition for its complete reasoning and any associated illustrations. The petition and all supporting documents are available by logging onto the Federal Docket Management System (FDMS) Web site at: <http://www.regulations.gov/> and following the online search instructions to locate the docket number listed in the title of this notice.

In summation, Cooper believes that the described noncompliance of the subject tires is inconsequential as it relates to motor vehicle safety, and that its petition, to exempt Cooper from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and remedying the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject tires that Cooper no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve equipment distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant tires under their control after Cooper notified them that the subject noncompliance existed.
