

NMFS recognizes that any alternatives considered in the draft PEIS will be based on the combined input from the public, research institutions, fishermen, non-governmental organizations, and affected State and Federal agencies, and Council processes. A principal objective of the scoping process is to identify a range of alternatives that will delineate critical issues and provide a clear basis for distinguishing among those alternatives, and to support the selection of a preferred alternative. NMFS is seeking input during scoping regarding the eight actions in Table 1 that make up the features of an aquaculture management program to assist in developing the reasonable range of alternatives to analyze in the draft PEIS.

In addition, NMFS is seeking input from the public on the issues that NMFS should address in the draft PEIS related to an aquaculture management program and the potential direct, indirect, and cumulative effects of the alternatives on the human environment. After NMFS analyzes a set of management alternatives, the Council may recommend a preferred proposed Federal action alternative. NMFS would then analyze the preferred alternative and a reasonable range of alternatives in a draft PEIS.

Public Involvement

Through this notice, we are notifying the public that NMFS has initiated a NEPA analysis and decision-making process for this proposed action so that interested or affected people may participate and contribute to the development of a final set of alternatives and analysis of environmental effects for NMFS and the Council to consider for an aquaculture management program. Public involvement will provide the information required by NMFS and the Council to identify the necessary scope and range of reasonable management alternatives including the need for additional alternatives that will provide a sound and scientific basis for developing a sustainable and long-term aquaculture management program in the PIR.

NMFS will again ask for additional public comments once NMFS publishes the Draft PEIS, probably in late spring 2017. You may find more information about the NMFS aquaculture program and the progress of the PEIS at http://www.fpir.noaa.gov/SFD/SFD_aq.html.
