

the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725—17th Street NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230 or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

DATES: Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for Partnerships for Research and Education in Materials (PREM).

OMB Number: 3145-0232.

Type of Request: Intent to seek approval to renew an information collection.

Overview of This Information Collection: NSF has standing authority to support activities to improve the participation of women and minorities in science and engineering under the Science and Engineering Equal Opportunities Act (Public Law 96-516), and authority to collect data on those issues.

The Partnerships for Research and Education in Materials (PREM) aims to enhance diversity in materials research and education by stimulating the development of formal, long-term,

collaborative research and education relationships between minority-serving colleges and universities and centers, institutes and facilities supported by the NSF Division of Materials Research (DMR). With this collaborative model PREMs build intellectual and physical infrastructure within and between disciplines, weaving together knowledge creation, knowledge integration, and knowledge transfer. PREMs conduct world-class research through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge thus created is meaningfully linked to society, with an emphasis on enhancing diversity.

PREMs enable and foster excellent education, integrate research and education, and create bonds between learning and inquiry so that discovery and creativity more fully support the learning process. PREMs capitalize on diversity through participation and collaboration in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

PREMs will be required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. To support this review and the management of the award PREMs will be required to develop a set of management and performance indicators for submission annually to NSF via the Research Performance Project Reporting module in Research.gov and an external technical assistance contractor that collects programmatic data electronically. These indicators are both quantitative and descriptive and may include, for example, the characteristics of personnel and students; sources of financial support and in-kind support; expenditures by operational component; research activities; education activities; patents, licenses; publications; degrees granted to students involved in PREM activities; descriptions of significant advances and other outcomes of the PREM effort.

Each PREM's annual report will address the following categories of activities: (1) Research, (2) education, (3) knowledge transfer, (4) partnerships, (5) diversity, (6) management, and (7) budget issues.

For each of the categories the report will describe overall objectives for the year, problems the PREM has encountered in making progress towards goals, anticipated problems in the

following year, and specific outputs and outcomes.

PREMs are required to file a final report through the RPPR and external technical assistance contractor. Final reports contain similar information and metrics as annual reports, but are retrospective.

Use of the Information: NSF will use the information to continue funding of PREMs, and to evaluate the progress of the program.

Estimate of Burden: 34 hours per PREM for 12 PREMs for a total of 408 hours.

Respondents: Non-profit institutions.

Estimated Number of Responses per Report: One from each of the twelve PREMs.

Dated: August 22, 2016.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-027 and 52-028; NRC-2008-0441]

South Carolina Electric & Gas Company and South Carolina Public Service Authority; Virgil C. Summer Nuclear Station, Units 2 and 3; Piping Line Number Additions, Deletions and Functional Capability Re-Designation

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 39 to Combined Licenses (COL), NPF-93 and NPF-94. The COLs were issued to South Carolina Electric & Gas Company (SCE&G), and South Carolina Public Service Authority (the licensee) in March 2012, for the construction and operation of the Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3, located in Fairfield County, South Carolina.

The granting of the exemption allows the changes to Tier 1 information requested in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and amendment were issued on January 20, 2016.

ADDRESSES: Please refer to Docket ID NRC-2008-0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. Specific information on NRC's PDR is available at <http://www.nrc.gov/reading-rm/pdr.html>.

FOR FURTHER INFORMATION CONTACT: Ruth C. Reyes, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-3249; email: Ruth.Reyes@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

In a letter dated December 18, 2014, the licensee requested a license amendment and exemption (ADAMS Accession No. ML14353A107), and supplemented this request by letters dated June 29 and October 16, 2015 (ADAMS Accession Nos. ML15180A248 and ML15292A075, respectively). The NRC is granting an exemption from Tier 1 information in the certified DCD incorporated by reference in part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), appendix D, "Design Certification Rule for the

AP1000 Design," and issuing License Amendment No. 39 to COLs, NPF-93 and NPF-94, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," appendix D to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought to add or delete line numbers of existing piping lines, as well as update the functional capability classification of existing process flow lines, to provide consistency with the Updated Final Safety Analysis Report Tier 2 information.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML15336A872.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF-93 and NPF-94). These documents can be found in ADAMS under Accession Nos. ML15336A867 and ML15336A866, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF-93 and NPF-94 are available in ADAMS under Accession Nos. ML15336A869 and ML15336A868, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VCSNS, Units 2 and 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated December 18, 2014, and as supplemented by letters dated June 29 and October 16, 2015, the licensee requested from the NRC an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR

part 52, appendix D as part of license amendment request 13-28, "Piping Line Number Additions, Deletions and Functional Capability Re Designation."

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation that supports this license amendment, which can be found at ADAMS Accession No. ML15336A872, the Commission finds that:

A. The exemption is authorized by law;

B. The exemption presents no undue risk to public health and safety;

C. The exemption is consistent with the common defense and security;

D. Special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. The special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption, and

F. The exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption to the provisions of 10 CFR part 52, appendix D, Section III.B, to allow deviations from the certified DCD Tier 1 Tables 2.1.2-2, 2.2.1-2, 2.2.2-2, 2.2.3-2, 2.3.6-2, 2.3.7-2, and 2.7.1-2, as described in the licensee's request dated December 18, 2014, and as supplemented by letters dated June 29 and October 16, 2015. This exemption is related to, and necessary for, the granting of License Amendment No. 39, which is being issued concurrently with this exemption.

3. As explained in Section 5 of the NRC staff's Safety Evaluation that supports this license amendment (ADAMS Accession No. ML15336A872), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

The request for the amendment and exemption was submitted by the letter dated December 18, 2014. The licensee supplemented this request by the letters dated June 29 and October 16, 2015. The proposed amendment is described in Section I, of this **Federal Register** notice.

The Commission has determined that the amendment requested by the licensee complies with the standards

and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on April 28, 2015 (80 FR 23606). The June 29 and October 16, 2015, supplements had no effect on the no significant hazards consideration determination, and no comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on December 18, 2014, and supplemented by the letters dated June 29 and October 16, 2015. The exemption and amendment were issued on January 20, 2016, as part of a combined package to the licensee (ADAMS Accession No. ML15336A862).

Dated at Rockville, Maryland, this 16th day of August 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Acting Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

BILLING CODE 7590-01-P

POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service®.

ACTION: Notice of establishment of new system of records.

SUMMARY: The United States Postal Service® (Postal Service) is proposing to establish a new Customer Privacy Act System of Records (SOR) to support the Informed Delivery™ notification service.

DATES: This system will become effective without further notice on September 26, 2016 unless, in response to comments received on or before that date, the Postal Service makes any substantive change to the purpose or routine uses set forth, or to expand the availability of information in this system, as described in this notice. If the Postal Service determines that certain portions of this SOR should not be implemented, or that implementation of certain portions should be postponed in light of comments received, the Postal Service may choose to implement the remaining portions of the SOR on the stated effective date, and will provide notice of that action.

ADDRESSES: Comments may be mailed or delivered to the Privacy and Records Office, United States Postal Service, 475 L'Enfant Plaza SW., Room 1P830, Washington, DC 20260-0004. Copies of all written comments will be available at this address for public inspection and photocopying between 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Janine Castorina, Chief Privacy Officer/A, Privacy and Records Office, 202-268-3089 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision, change, or addition, or when the agency establishes a new system of records. The Postal Service is establishing a new system of records to support an expansion of its Informed Delivery™ notification service.

I. Background

Informed Delivery™ is a digital service that allows enrolled users to receive an email notification that contains grayscale images of the outside of their letter-sized mailpieces processed by USPS automation equipment prior to delivery. This service is offered at no cost to the consumer. Informed Delivery™ is currently available in areas of New York, Connecticut, and Northern Virginia (NoVa). The Postal Service intends to expand this service to the Capital Region (Washington, DC, Baltimore, and Richmond) in September 2016, with national expansion planned for 2017. The establishment of this new USPS Privacy Act System of Records is intended to support this expansion.

II. Rationale for Changes to USPS Privacy Act Systems of Records

Expansion and User Acquisition Strategy

Informed Delivery™ is making mail a more valuable and effective communication channel for consumers, increasing the relevancy of physical mail in today's highly digital environment. Informed Delivery™ offers residential customers the convenience of knowing what is in their mailbox from anywhere, even while traveling. Providing advance notice of mail delivery also allows consumers to take action before important pieces reach their mailbox, revolutionizing the customer experience with mail. In some cases, email notifications with mailpiece images will include interactive content, such as "ride-along" images or related links from the business mailer. Lastly, users will have access to an online dashboard, which will display their mailpiece images from the previous six days.

Currently, there are over 75,000 Informed Delivery™ users in areas of Northern Virginia, New York, and Connecticut. According to USPS data, 90 percent of users surveyed in Northern Virginia have said they would recommend Informed Delivery™ to friends or family, and 97 percent of those surveyed in New York would likely continue using the service. In light of the positive feedback that the Postal Service has received from Informed Delivery™ users, the Postal Service intends to expand the Informed Delivery™ notification service to the Washington, DC, Baltimore, and Richmond metropolitan areas in September 2016, with national expansion planned for 2017. To achieve this goal, the Postal Service has developed a comprehensive user acquisition strategy that includes a direct mail referral campaign, email campaigns sent to My USPS and USPS.com users, and promotion at retail locations. For the referral campaign, USPS will send a mailpiece to current Informed Delivery™ users with the request that they send the provided tear-off cards to friends and family who may be interested in the service. As part of the user acquisition strategy, the Postal Service will be collecting personal information from internal and external sources, as identified below.

Informed Delivery™ is currently supported by two Privacy Act Systems of Records, USPS 810.100, www.usps.com Registration and USPS 820.200, Mail Management and Tracking Activity. The Postal Service has determined that a new system of
