

currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because of a change in assumption. This ICR assumes all existing respondents will have to re-familiarize themselves with the regulatory requirements each year.

There is an adjustment increase in the total estimated capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in capital and O&M costs occurred because this ICR uses updated labor rates for contractor labor related to capital and O&M costs.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the specific requirements at 40 CFR part 63, subpart EEEEE. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Iron and steel foundries.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart EEEEE).

Estimated number of respondents: 98 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 30,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$3,490,000 (per year), which includes \$400,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden and cost as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because this ICR assumes that all existing respondents will have to familiarize with regulatory requirements each year.

There is a small adjustment decrease of \$60 in the total capital and O&M cost as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. The change in estimates occurred because this ICR rounds totals to three significant figures.

The telephone number for the Docket Center is (202) 566–1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

ICR status: This is a new ICR. Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This new ICR will cover the paperwork activities associated with EPA's program to encourage the use of Integrated Pest Management (IPM) as

the preferred approach to pest control in the nation's schools. IPM is a smart, sensible, and sustainable approach to pest control that emphasizes the remediation of pest conducive conditions. IPM combines a variety of pest management practices to provide effective, economical pest control with the least possible hazard to people, property, and the environment. These practices involve exclusion of pests, maintenance of sanitation, and the judicious use of pesticides. The EPA's statutory authorities for this collection of information are set forth in the Pollution Prevention Act of 1990, the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), and the Food Quality Protection Act (FQPA) of 1996.

The Agency's IPM implementation efforts are based on a wholesale approach aimed at kindergarten through 12th grade public and Tribal schools. The Agency intends to use the information collected through this ICR to encourage school districts to implement IPM programs and to recognize those that have attained a notable level of success. Because IPM implementation occurs along a continuum, the School IPM (SIPM) incentive program will recognize each milestone step a school district must take to begin, grow, and sustain an IPM program.

This program has five awards categories—*Great Start, Leadership, Excellence, Sustained Excellence, and Connector or National Change Agency Award*. The first four categories are stepwise levels that are reflective of the effort, experience, and, ultimately, success that results from implementing EPA-recommended IPM tactics that protect human health and the environment. Schools with pest infestations are not only exposed to potential harm to health and property, but also to stigmatization. The School IPM recognition program will give districts across the nation the opportunity to receive positive reinforcement through public recognition of their efforts in implementing pest prevention and management strategies.

Form Names/numbers: Great Start Award; Leadership Award; Excellence Award; Connector or National Change Agency Award.

Respondents/affected entities: Entities potentially affected by this ICR are school districts, or other entities represent by them.

Respondent's obligation to respond: Voluntary, required to obtain or retain a benefit.

Estimated number of respondents: Annual average of 53 (total).

Frequency of response: On occasion.

Total estimated burden: 859 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$72,000 (per year), includes \$0 annualized capital or operation and maintenance costs.

Changes in the Estimates: This is a new ICR.

Authority: 44 U.S.C. 3501 *et seq.*
