Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as the specific requirements at 40 CFR part 60, subparts DDDD. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Respondents/affected entities: Commercial and industrial solid waste incineration units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart DDDD).

Estimated number of respondents: 90 (total).

Frequency of response: Initially, occasionally and annually.

Total estimated burden: 19,700 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$3,250,000 (per year), which includes \$1,220,000 in either annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden hours and cost as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because of a change in assumption. This ICR assumes that all existing respondents will have to re-familiarize themselves with the regulatory requirements each year.

There is an adjustment increase in the total estimated capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in capital and O&M costs occurred because this ICR uses updated labor rates for contractor labor related to capital and O&M costs.
