The SVS will be conducted as a supplement to the NCVS in all sample households for a six (6) month period. The SVS is primarily an effort to measure the prevalence of stalking victimization among persons, the types of stalking victimization experienced, the characteristics of stalking victims, the nature and consequences of stalking victimization, and patterns of reporting to the police. BJS plans to publish this information in reports and reference it when responding to queries from the U.S. Congress, Executive Office of the President, the U.S. Supreme Court, state officials, international organizations, researchers, students, the media, and
