PHMSA has received the following special permit requests:

Docket No.	Requester	Regulation(s)	Nature of special permit
PHMSA-2007-0038.	ConocoPhillips Alaska Inc. (CPAI).	49 CFR 192.481 and 195.583	To authorize ConocoPhillips Alaska Inc (CPAI), in its capacity as Operator of the Kuparuk Transportation Company and the Oliktok Pipeline Company, to meet its obligations under the regulations to monitor atmospheric corrosion on above ground pipelines.

Docket No.	Requester	Regulation(s)	Nature of special permit
PHMSA–2016–0072.	Magellan Midstream Partners, L.P. (Magellan).	49 CFR 195.432	<p>The special permit request is for: The 9.2 miles of 18-inch diameter and 27.7 miles of 24-inch diameter Kuparuk Oil Pipeline (Operator Identification (OPID): 10346) including Divert Tank “A”; 27.91 miles of 16-inch diameter Oliktok Gas Pipeline (OPID: 31341); and 34.6 miles of 14-inch diameter Alpine Oil Pipeline (OPID: 31552).</p> <p>CPAI changed operations as follows: Switched from natural gas liquids transport to natural gas transport service and modified one pipeline to allow the special permit segment to be inspected by an in-line inspection (ILI) tool. CPAI requests the modification of the current special permit to continue to inspect areas “susceptible” to atmospheric corrosion for their non-piggable, insulated, regulated pipelines on the North Slope of Alaska. The modification will include additional regulations covering 49 CFR Part 192 for natural gas service.</p> <p>The Oliktok Pipeline (OPID: 31341) changed service from natural gas liquids to natural gas in 2014.</p> <p>The Kuparuk Pipeline (OPID: 10346) segment was modified in 2009 to allow ILI. All of these pipelines are being inspected by ILI tools on either a 2 or 3-year interval.</p> <p>To authorize Magellan a special permit for variance from Federal regulations of 49 CFR 195.432, for a transitional staged breakout tank inspection schedule. Magellan claims that the January 5, 2015, Rulemaking, “Periodic Updates of Regulatory References to Technical Standards and Miscellaneous Amendments” (80 FR 168), which removed Section 6.4.3 of API Standard 653, would significantly accelerate the inspection intervals of 553 of its 800 Breakout Tanks. These tanks are located in the States of: Colorado, Connecticut, Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, Wisconsin and Wyoming. Additionally the rule would require Magellan to accelerate inspections of approximately 100 tanks by January 5, 2017. Due to this requirement, Magellan expects it would experience significant logistical challenges in securing additional project personnel, qualified contractors, and reputable inspection services to oversee the accelerated tank inspections. Magellan proposes to use the transitional staged Breakout Tank inspection to provide an equivalent or higher level of pipeline integrity while leading to full and sustained compliance with the federal regulations.</p>
PHMSA–2016–0073.	New Fortress Energy TICO Development Partners (TICO), LLC.	49 CFR 193.2155(b)	<p>To authorize TICO a special permit for variance from Federal regulations of 49 CFR 193.2155(b) to operate a liquefied natural gas (LNG) tank over $\frac{3}{5}$ of a mile south-southeast of the Space Coast Regional Airport in association with the construction of their future liquefaction, storage and transfer facility in Titusville, Florida. TICO proposes to locate the LNG Tank on part of a property measuring approximately 64 acres in a location that is over $\frac{3}{5}$ of a mile south-southeast from the southern edge of Runway $18\frac{3}{16}$ at TIX (the Project Site). The Project Site and the surrounding area is zoned M–2, which allows for industrial and heavy industrial uses, and occupies an area planned for industrial development situated between TIX and an existing thermal power plant. The Project Site sits adjacent to the Florida East Coast Railway line and a natural gas pipeline located immediately east of the Project Site.</p>

Issued in Washington, DC, on September 7, 2016, under authority delegated in 49 CFR 1.97.
