

determination is in the ITAAC Closure Verification Evaluation Form (VEF) for each ITAAC. The VEF is a form that represents the NRC staff's structured process for reviewing ICNs. Each ICN presents a narrative description of how the ITAAC was completed. The NRC's ICN review process involves a determination on whether, among other things: (1) Each ICN provides sufficient information, including a summary of the methodology used to perform the ITAAC, to demonstrate that the inspections, tests, and analyses have been successfully completed; (2) each ICN provides sufficient information to demonstrate that the acceptance criteria of the ITAAC are met; and (3) any NRC inspections for the ITAAC have been completed and any ITAAC findings associated with that ITAAC have been closed.

The NRC staff's determination of the successful completion of these ITAAC is based on information available at this time and is subject to the licensee's ability to maintain the condition that the acceptance criteria are met. If the staff receives new information that suggests the staff's determination on any of these ITAAC is incorrect, then the staff will determine whether to reopen that ITAAC (including withdrawing the staff's determination on that ITAAC). The NRC staff's determination will be used to support a subsequent finding, pursuant to 10 CFR 52.103(g), at the end of construction that all acceptance criteria in the combined license are met. The ITAAC closure process is not finalized for these ITAAC until the NRC makes an affirmative finding under 10 CFR 52.103(g). Any future updates to the status of these ITAAC will be reflected on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/oversight/itaac.html>.

This notice fulfills the staff's obligations under 10 CFR 52.99(e)(1) to publish a notice in the **Federal Register** of the NRC staff's determination of the successful completion of inspections, tests and analyses.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC issued a license to Strata for its Ross ISR Facility in Crook County, Wyoming in April 2014. Along with the issuance of the license, the NRC published a ROD that supported its decision to approve Strata's license application for the Ross ISR Facility.

After the license was issued, the NRC's ASLB, an independent, trial-level adjudicatory body, granted a hearing request from joint intervenors, the Natural Resources Defense Council and the Powder River Basin Resource Council. The ASLB held an evidentiary hearing from September 30, 2014, through October 1, 2014, for three admitted contentions on environmental matters related to the licensing of the Ross ISR Facility. In its initial decision following the hearing, the ASLB ruled in favor of Strata and the NRC on all three contentions. In doing so, the ASLB supplemented the ROD to include a revised license condition (10.12) and additional analyses that were placed on the record by various parties. In June 2016, the Commission denied a petition for review of the ASLB's decision. The NRC's initial ROD was published on April 24, 2014. The updated ROD

accounts for the ASLB's decision and the Commission's ruling.
