

FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exists that warrant preparation of an environmental assessment.

BILLING CODE 4910–13–P

FEDERAL TRADE COMMISSION

16 CFR Part 305

RIN 3084–AB03

Energy Labeling Rule

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission ("Commission") amends its Energy Labeling Rule ("Rule") by publishing new ranges of comparability for required EnergyGuide labels on clothes washers.

DATES: The amendments announced in this document will become effective May 11, 2016.

FOR FURTHER INFORMATION CONTACT:

Hampton Newsome, Attorney, Division of Enforcement, Federal Trade Commission, Washington, DC 20580 (202–326–2889).

SUPPLEMENTARY INFORMATION:

I. Background

The Commission issued the Energy Labeling Rule in 1979, 44 FR 66466 (Nov. 19, 1979) pursuant to the Energy Policy and Conservation Act of 1975 ("EPCA").¹ The Rule covers several categories of major household products, including clothes washers. It requires manufacturers of covered products to disclose specific energy consumption or efficiency information (derived from Department of Energy ("DOE") test procedures) at the point-of-sale. In addition, each label must include a "range of comparability" indicating the highest and lowest energy consumption or efficiencies for comparable models. The Commission updates these ranges periodically.

II. Range Updates for Clothes Washers

The Commission amends its comparability ranges for clothes washers in the Rule based on manufacturer model data derived from the DOE test procedures and submitted to DOE (<https://www.regulations.doe.gov/ccms>).² The

¹ 42 U.S.C. 6294. EPCA also requires the Department of Energy ("DOE") to set minimum efficiency standards and develop test procedures to measure energy use.

² Previously, the Commission announced its intention to update the clothes washer ranges based

amendments update the ranges in Appendix F1 and F2 and the sample labels in Appendix L of the Rule. The amendments also include conforming changes to sections 305.7, 305.10, and 305.11 to remove obsolete regulatory text applicable to models produced before March 7, 2015. Manufacturers have until May 11, 2016 to begin using the updated ranges on their labels. As indicated in section 305.10(a) of the Rule, products that have been labeled prior to this effective date need not be relabeled.

III. Administrative Procedure Act

The amendments published in this document involve routine, technical and minor, or conforming changes to the labeling requirements in the Rule. Accordingly, the Commission has good cause under section 553(b)(B) of the APA to forgo notice-and comment procedures for these rule amendments. 5 U.S.C. 553(b)(B). These technical amendments merely provide a routine, conforming change to the range information required on EnergyGuide labels. The Commission therefore finds for good cause that public comment for these technical, procedural amendments is impractical and unnecessary.

IV. Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a Regulatory Flexibility Act analysis (5 U.S.C. 603–604) are not applicable to this proceeding because the amendments do not impose any new obligations on entities regulated under the Energy Labeling Rule. These technical amendments merely provide a routine change to the range information required on EnergyGuide labels. Thus, the amendments will not have a "significant economic impact on a substantial number of small entities."³ The Commission has concluded, therefore, that a regulatory flexibility analysis is not necessary, and certifies, under Section 605 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that the amendments announced today will not have a significant economic impact on a substantial number of small entities.

V. Paperwork Reduction Act

The current Rule contains recordkeeping, disclosure, testing, and reporting requirements that constitute information collection requirements as defined by 5 CFR 1320.3(c), the definitional provision within the Office of Management and Budget (OMB)

on test data derived from updated DOE test requirements. See 80 FR 67351, 67355, n. 29 (Nov. 2, 2015).

³ 5 U.S.C. 605.

regulations that implement the Paperwork Reduction Act (PRA). OMB has approved the Rule's existing information collection requirements through May 31, 2017 (OMB Control No. 3084 0069). The amendments now being adopted do not change the substance or frequency of the recordkeeping, disclosure, or reporting requirements and, therefore, do not require further OMB clearance.
