Abstract of Proposed Collection

The International Traffic in Arms Regulations (ITAR) §§ 122.4 and 129.8 require registrants to notify the Directorate of Defense Trade Controls of the Department of State in the event of a change in registration information, in the event a foreign person or entity acquires a registered entity, or if the registrant is a party to a merger,

acquisition, or divestiture (MAD) of an entity producing or marketing ITAR-controlled items. Based on certain conditions enunciated in the ITAR, respondents must notify DDTC of these changes at differing intervals—no less than 60 days prior to the event and/or within 5 days of its culmination. This information is necessary for DDTC to ensure registration records are accurate and to determine whether the transaction is in compliance with the regulations (e.g. with respect to ITAR § 126.1); assess the steps that need to be taken with respect to existing authorizations (e.g. transfers of licenses); and to evaluate the implications for US national security and foreign policy. This information collection is estimated to take an average of 2 hours to execute, and DDTC expects to receive approximately 1,700 responses per year; therefore, the total burden for this collection will be 3,400 hours per year.

Summary of Public Comments Received

On June 20, 2016, DDTC published a **Federal Register** Notice (81 FR 39992) soliciting public comments through August 19, 2016. DDTC received nine public comments during this period. One comment was not germane to the proposed information collection. The remaining eight comments provided significant feedback on the form. These comments are summarized below:

One commenter remarked that the proposed 2-hour burden for the DS-7789 is low and should be revised. DDTC replies that the burden is an average of all submissions using the DS-7789, and while some responses will require a longer period based on the complexity of a transaction, many will be far below the declared burden for the form. Similarly, information previously provided to the Directorate via the DS-2032, Statement of Registration, will auto-populate into the DS-7789, saving respondents the burden of re-keying their basic information multiple times. DDTC therefore believes that a 2-hour burden is accurate for this form.

Another comment centered on the name of the form itself, “Statement of Material Change, Merger, Acquisition, or Divestiture of a Registered Party.” The commenter was concerned that the term “material change” is inconsistent with current business usage and the use of this form could potentially affect the market value of the submitting company. While DDTC understands these concerns, the changes that require notification, and are therefore “material changes” for ITAR purposes, are defined in the regulations (see ITAR § 122.4).
