

requires us to develop a CCP for each national wildlife refuge. The purpose in developing a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System (NWRS), consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Each unit of the NWRS was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each refuge within the NWRS mission, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the NWRS.

Additional Information

The final CCP may be found at http://www.fws.gov/mountain-prairie/refuges/wy_ner.php. The final CCP includes detailed information about the planning process, refuge, issues, and management alternative selected. The Web site also includes an EA, prepared in accordance with the National Environmental Policy Act (NEPA) (43 U.S.C. 4321 *et seq.*). The EA includes discussion of four alternative refuge management options. The Service's selected alternative is reflected in the final CCP, and also in the FONSI.

The selected alternative focuses on habitat and wildlife management that allow for natural processes to promote habitats. Some habitats, such as wetlands, will be managed to enhance swan habitat and improve forage quantity and quality for elk and bison. The refuge will increase opportunities for wildlife-dependent public uses such as hunting, fishing, wildlife observation and photography, and environmental education. We will keep some areas undeveloped, return some areas to a

natural state, and increase development in other areas to enhance visitor services. A detailed description of objectives and actions included in this selected alternative is found in chapter 4 of the final CCP.
