Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission’s Rules of Practice and Procedures (18 CFR 385.214).¹ Only intervenors have the right to seek rehearing of the Commission’s decision. The Commission grants affected landowners and others with environmental concerns intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which no other party can adequately represent. Simply filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered.

National Fuel seeks authorization of this proposed Project to; (1) Increased capacity on National Fuel’s existing Line D system by 77,500 Dekatherm per day, by increasing the operating pressure of Line AM60 and Line D, in order to provide firm transportation service to the Erie and Warren,

Pennsylvania markets area from TGP at Lamont and to ensure that all existing storage withdrawal obligations can reliably be met, this will be accomplished by the installation of three-1,380 hp compressor stations (4,140 total hp) two of the three new compressor units at Keelor compressor station will be used to withdraw gas from the Keelor Storage Field and deliver such gas into Line AM60 (which is referred to as Line D west of the Roystone Compressor Station), the third compressor unit will be used to increase the pressure of gas withdrawn from National Fuel’s East Branch and Swede Hill Storage Fields (2) to allow National Fuel to flow increased receipts from Tennessee Gas Pipeline, LLC (TGP) at Lamont and/or gas from Line K South of Bowen compressor station, through the Bowen compressor station, into Line K north of Bowen compressor station, and ultimately to Line AM60 and Line D, at sufficient pressure to allow the incremental volumes subscribed for by the Project shippers to reach the Erie and Warren, Pennsylvania markets, (3) to allow National Fuel to flow increased receipts from TGP at Lamont and/or gas from Line K south of Bowen compressor station, through the Bowen compressor station, into Line K north of Bowen compressor station, and ultimately to Line AM60 and Line D, at sufficient pressure to allow the incremental volumes subscribed for by the Project shippers to reach the Erie and Warren, Pennsylvania markets. The purpose of the proposed Roystone compressor station modification is to allow gas withdrawn from East Branch and Swede Hill storage fields, and first compressed and dehydrated by the Roystone compressor station, to reach the proposed Keelor compressor station for further compression up to the increased system maximum operating pressure of Line D of 720 psig. The Project, all as more fully set forth in the application which is on file with the Commission and open for public inspection. The filing may also be viewed on the web at <http://www.ferc.gov> using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the document.
