Notice of Availability of the Draft Environmental Impact Statement for the Proposed Rover Pipeline, Panhandle Backhaul, and Trunkline Backhaul Projects

	Docket Number
Rover Pipeline, LLC	CP15-93-000
Panhandle Eastern Pipe Line Company, LP	CP15-94-000
Trunkline Gas Company, LLC	CP15-96-000

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a draft environmental impact statement (EIS) for the Rover Pipeline, Panhandle Backhaul, and Trunkline Backhaul Projects (Projects), proposed by Rover Pipeline, LLC (Rover), Panhandle Eastern Pipe Line Company, LP (Panhandle), and Trunkline Gas Company, LLC (Trunkline), respectively, in the above-referenced dockets. Rover requests authorization to construct, operate, and maintain certain natural gas pipeline facilities to transport about 3.25 billion cubic feet per day (Bcf/d) of stranded natural gas from Marcellus and Utica production areas in West Virginia, Pennsylvania, and Ohio to markets in the United States and Canada. Panhandle requests authorization to modify existing facilities and install an interconnection with Rover in Defiance County, Ohio to accommodate 0.75 Bcf/d of east-to-west firm transportation service. Trunkline would modify existing facilities, including piping at the existing Panhandle-Trunkline Interconnect in Douglas County, Illinois to provide 0.75 Bcf/d of north-to-south firm transportation service.

The draft EIS assesses the potential environmental effects of the construction and operation of the Projects in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the Projects would have some adverse and significant environmental impacts; however, these impacts would be reduced to acceptable levels with the implementation of Rover's, Panhandle's, and Trunkline's proposed mitigation

and the additional measures recommended by staff in the draft EIS.

The U.S. Environmental Protection Agency (EPA), the U.S. Army Corps of Engineers (COE), the U.S. Fish and Wildlife Service (FWS), the Ohio Environmental Protection Agency (OHEPA), and the West Virginia Department of Environmental Protection (WVDEP) participated as cooperating agencies in the preparation of the EIS. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposals and participate in the NEPA analysis. Although the cooperating agencies provided input to the conclusions and recommendations presented in the draft EIS, the agencies will present their own conclusions and recommendations in their respective Records of Decision for the Projects.

The draft EIS addresses the potential environmental effects of the construction and operation of the following facilities:

- 510.7 miles of new 24- to 42-inch-diameter natural gas pipeline and appurtenant facilities that include 10 new compressor stations, 19 new meter stations, 5 new tie-ins, 78 mainline valves, and 11 pig launcher and receiver facilities.¹
- modifications by Panhandle at four existing compressor stations, one interconnection, and three valve sites; and
- modifications by Trunkline at four existing compressor stations and one meter station.

The FERC staff mailed copies of the draft EIS to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding. Paper copy versions of this EIS were mailed to those specifically requesting them; all others received a CD version. In addition, the draft EIS is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Any person wishing to comment on the draft EIS may do so. To ensure consideration of your comments on the
