- If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without the above information, the component(s) may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

SUPPLEMENTARY INFORMATION: We announce the availability of a draft supplemental environmental impact

statement (SEIS) that has been prepared to evaluate the Ballville Dam Project, in Sandusky County, Ohio, in accordance with the requirements of the National Environmental Policy Act (NEPA). We are also announcing a public meeting and requesting public comments.

Background

Ballville Dam was built in 1913 for hydroelectric power generation. The City of Fremont purchased the dam in 1959 from the Ohio Power Company for the purpose of supplying water to the city. With the construction of a raw water reservoir, the dam is no longer required for this purpose. Moreover, in 2007, the Ohio Department of Natural Resources issued a Notice of Violation to the City, stating that the dam was being operated in violation of the law as a result of its deteriorated condition.

Ballville Dam is currently a complete barrier to upstream fish passage and impedes hydrologic processes. The purpose for the issuance of Federal funds and preparation of this Draft SEIS is to remove Ballville Dam and restore natural hydrological processes over a 40-mile stretch of the Sandusky River, reopen fish passage to 22 miles of additional habitat, restore flow conditions for fish access to habitat above the impoundment, and improve overall conditions for native fish communities in the Sandusky River system, restoring self-sustaining fish resources.

We published a final EIS in the **Federal Register** on August 1, 2014 (79 FR 44856), for the Ballville Dam Project that addressed the environmental, economic, cultural and historical, and safety issues associated with the proposed removal of the dam and a suite of alternatives. The final EIS analyzed four alternatives for the removal: (1) Proposed Action—Incremental Dam Removal with Ice Control Structure; (2) No Federal Action; (3) Fish Elevator Structure; and (4) Dam Removal with Ice Control Structure. The final EIS considered the direct, indirect, and cumulative effects of the alternatives, including any measures under the Proposed Action alternative intended to minimize and mitigate such impacts. The final EIS also identified additional alternatives that were considered, but were eliminated from consideration as detailed in Section 2.3 of the final EIS.

Draft Supplemental Environmental Impact Statement

This draft SEIS provides further discussion of the potential significant impacts of the proposed action and an analysis of reasonable alternatives to the
