### The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to provide additional controlled airspace for a new Instrument Flight Rules (IFR) procedure at the St. Charles Co. Smartt Airport, MO; Camdenton Memorial Airport, MO; Monett Municipal Airport, MO; West Plains Municipal Airport, MO; Butler Municipal Airport, MO; Point Lookout, M. Graham Clark Airport, MO; Sedalia Memorial Airport, MO; Monroe City Regional Airport, MO; Farmington Regional Airport, MO; Kaiser, Lee C. Fine Airport, MO; Fort Leavenworth, Sherman AAF, KS; and Dodge City Regional Airport, KS. The additional airspace would segregate aircraft operating under VFR conditions from aircraft operating under IFR procedures. The area would be depicted on appropriate aeronautical charts thereby enabling pilots to circumnavigate the area or otherwise comply with IFR procedures. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[SPATS No. NM-037-FOR]

#### New Mexico Regulatory Program

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Interior.

**ACTION:** Proposed rule; public comment period and opportunity for public hearing on proposed amendment.

**SUMMARY:** Office of Surface Mining Reclamation and Enforcement (OSM) is announcing receipt of a proposed amendment to the New Mexico regulatory program (hereinafter, the "New Mexico program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of revisions to or additions of rules pertaining to permit application contents for contour maps of the permit area and operations exclusively under reclamation, permit approval or denial, contents of bond release applications, timeliness of backfilling and grading, approval of small depressions, performance standards for all roads and primary roads, and blaster examination and certification requirements. The amendment is intended to revise the New Mexico program to incorporate the additional flexibility afforded by the revised Federal regulations, as
