DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service****Notice of Availability of a Technical/ Agency Draft Recovery Plan for the Mitchell's Satyr Butterfly (*Neonympha mitchellii mitchellii*) for Review and Comment****AGENCY:** Fish and Wildlife Service, Interior.**ACTION:** Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a technical/agency draft recovery plan for the Mitchell's satyr butterfly (*Neonympha mitchellii mitchellii*). It occurs on private and public lands in southeastern Michigan and northern Indiana. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the technical/agency draft recovery plan must be received on or before May 28, 1996, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting Charles M. Wooley, Field Supervisor, East Lansing Field Office, 2651 Coolidge Road, East Lansing, Michigan 48823-6316, telephone (517) 351-2555. Comments and materials received are available for public inspection by appointment during normal business hours at the above address. Comments on the plan should be addressed to Mark Hodgkins (see **ADDRESSES**).

FOR FURTHER INFORMATION CONTACT: Mark Hodgkins at the above address, or telephone (517) 351-6289.

SUPPLEMENTARY INFORMATION:**Background**

Restoring an endangered or threatened animal or plant to the point

where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's (Service) endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels to reclassify to threatened or delist them, and estimate time and cost to implement the recovery measures needed. The Service revises existing recovery plans, as needed, to reflect important new biological information, significant changes in a species' status, or the accomplishment of tasks identified in the original plan.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The document submitted for review is the draft Mitchell's Satyr Butterfly (*Neonympha mitchellii mitchellii*) Recovery Plan. Of the 30+ historic populations known, only 11 extant, isolated populations remain in southwestern Michigan and one in northern Indiana. The species is considered extirpated from Ohio, New Jersey, and Maryland (if it actually occurred in that state).

The Mitchell's satyr butterfly was emergency listed as endangered on June 25, 1991, due to a perceived threat posed by overcollection. On May 20, 1992, the Mitchell's satyr butterfly received long-term protection through the normal listing process. The literature reflects some variability in the description of Mitchell's satyr habitat. Known habitats are all peatlands but range along a continuum from prairie/bog fen to meadow/swamp. However, a constant attribute in all historical and active habitats is a herbaceous community which is dominated by sedges, usually *Carex stricta*, with scattered deciduous and/or coniferous shrubs, most often tamaracks, or red cedar. Mitchell's satyr habitat is most easily characterized as a sedge-

dominated fen community. The greatest threat to *N. m. mitchellii* is continued loss of habitat due to development and fen alteration leading to disruption of ecological processes which create and maintain habitat.

The primary objective of this draft recovery plan is to protect an adequate number of Mitchell's satyr butterfly sites to ensure long-term viability of the species in the wild. Conditions that must be met to reclassify the Mitchell's satyr butterfly from endangered to threatened status include protection of a minimum of 16 geographically distinct, self-sustaining populations established or discovered range wide. Delisting will be considered when 25 geographically distinct, self-sustaining populations are established or discovered range wide for five consecutive years following reclassification. Also, a minimum of 15 of these sites would need the establishment of permanent protection with long-term management programs requiring some intervention.

Site protection will be accomplished through negotiating cooperative agreements and conservation easements with land owners and managers, acquiring lands from willing sellers, and using existing legislation to protect the Mitchell's satyr and their habitat. Other recovery activities will include searching for additional populations, monitoring population levels and habitat conditions, managing habitat as needed, conducting necessary studies, and conducting a general information program for the public.

The draft recovery plan is available for technical/agency review. After consideration of comments received during the review period, the recovery plan will be submitted to the Regional Director, Region 3, for final approval.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the recovery plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 20, 1996.

Mamie A. Parker,

Acting Assistant Regional Director, Ecological Services.

Geological Survey

Federal Geographic Data Committee (FGDC); Public Meeting of the FGDC Facilities Working Group

AGENCY: Geological Survey, Interior.

ACTION: Notice of two meetings.

SUMMARY: This notice is to invite public participation in two meetings of the FGDC Facilities Working Group. The major topics for these meetings are: the standardization of definitions for Facility and Installation; development of a Facility/Installation ID standard; and development of standards for utility, building, and environmental hazard geospatial data.

TIME AND PLACE: 8 April 1996, from 1:00 p.m. until 4:00 p.m., and 13 May 1996, from 1:00 p.m. until 4:00 p.m. The meetings will be held at Headquarters U.S. Army Corps of Engineers, in room 8222D of the Pulaski Building, 20 Massachusetts Avenue, NW., Washington, DC. The Pulaski Building is located just a few blocks west of Union Station.

FOR FURTHER INFORMATION CONTACT: Jennifer Fox, FGDC Secretariat, U.S. Geological Survey, 590 National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092; telephone (703) 648-5514; facsimile (703) 648-5755; Internet "gdc@usgs.gov".

SUPPLEMENTARY INFORMATION: The FGDC is a committee of Federal Agencies engaged in geospatial activities. The FGDC Facilities Working Group specifically focuses on geospatial data issues related to facilities and facility management. A facility is an entity with location, deliberately established as a site for designated activities. A facility database might describe a factory, a military base, a college, a hospital, a power plant, a fishery, a national park, an office building, a space command center, or a prison. The database for a complex facility may describe multiple functions or missions, multiple buildings, or even a county, town, or city. The objectives of the Working Group are to: promote standards of accuracy and currentness in facilities data that are financed in whole or in part by Federal funds; exchange information on technological improvements for collecting facilities data; encourage the Federal and non-Federal communities to identify and adopt standards and specifications for facilities data; and promote the sharing of facilities data among Federal and non-Federal organizations.
