Compliance with these requirements is mandatory for licensees subject to 10 CFR Part 26.

A proposed revision to 10 CFR Part 26 would modify the information collection requirements to, among other less significant changes, (1) Extend coverage to certain classes of fitness-for-duty programs; (2) require licensees to revise their written policy and procedures to incorporate minor administrative procedures, e.g., Medical Review Officer medical review procedures and changes to various technical guidelines contained in Appendix A of 10 CFR Part 26; (3) require all licensees to obtain information in addition to that currently provided in written form from individuals which would indicate whether the individual has a history of substance abuse; and (4) add fitness-for-duty personnel as a third class of people whose negative acts would be reported.

Submit by June 5, 1996, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

BILLING CODE 7590-01-P

Iowa, North Dakota and Utah; Relinquishment of Sealed Source and Device Evaluation Authority and Reassumption by the Commission

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of reassumption of sealed source and device evaluation authority from the states of Iowa, North Dakota, and Utah.

SUMMARY: Notice is hereby given that effective June 1, 1996, the Nuclear Regulatory Commission will reassume regulatory authority for sealed source and device evaluations in the Agreement States of Iowa, North Dakota, and Utah in response to requests from those States to relinquish that authority.

EFFECTIVE DATE: June 1, 1996.

FOR FURTHER INFORMATION CONTACT: Stephen Salomon, Office of State Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Telephone: (301) 415-2368. Internet: SNS@NRC.GOV.

SUPPLEMENTARY INFORMATION: Currently, Iowa, North Dakota, and Utah have agreements with the Nuclear Regulatory Commission (NRC) which grant these States authority to regulate specific categories of radioactive materials formerly regulated by NRC. These agreements have been entered into pursuant to Section 274b of the Atomic Energy Act of 1954, as amended. Recently, the NRC received letters from North Dakota Governor Edward T. Schafer (September 25, 1995), Iowa Governor Terry E. Branstad (January 22, 1996), and Utah Governor Michael O. Leavitt (January 16, 1996), each requesting to relinquish his State's authority to evaluate sealed sources and devices, and that the NRC reassume this authority. The requested NRC action would involve reassertion of regulatory authority by NRC over activities currently regulated by these States pursuant to their agreements with NRC.

The Governors note there has been little or no need to conduct such evaluations in the past and given no future prospects for device evaluations, they do not believe they can continue to justify the costs to the State to maintain this authority.

The Commission has agreed to these requests and has notified these Agreement States that effective June 1, 1996, the NRC will reassume authority to evaluate and approve sealed source and device applications within these States. Iowa, North Dakota, and Utah will retain authority to regulate the manufacture and use of sealed sources and devices within the respective State in accordance with its Section 274b agreement with the NRC.

Dated at Rockville, Maryland, this 30th day of April, 1996.

For the Nuclear Regulatory Commission.
John C. Hoyle,
Secretary of the Commission.
