The Census Bureau plans to conduct a survey of plant capacity. The Census Bureau has conducted this survey annually from 1973 through 1988. Then in 1990, 1992, and 1994 we collected 2 years worth of data concurrently. This request is regarding the 1996 survey which will collect data for 1995 and 1996. Data are gathered from a sample of manufacturing plants in the United States. The survey forms will collect data on the value of plant production during actual operations and at full production capability. The survey will also collect estimates of production under a national emergency situation. Data are used in measuring inflationary pressures, capital flows, in understanding productivity determinants, and analyzing and forecasting economic and industrial trends. The survey results will be used

by such agencies as the Federal Reserve Board, Federal Emergency Management Agency, International Trade Administration, and the Department of Defense.

**II. Method of Collection**
