FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill, Office of Federal Acquisition Policy, GSA (202) 501-3856.

SUPPLEMENTARY INFORMATION:

A. Purpose

Standard Form 255 is used by all Executive agencies to obtain information from architect-engineer (A-E) firms interested in a particular project. The information on the form is reviewed by a selection panel composed of professional people and assists the panel in selecting the most qualified A-E firm to perform the specific project. The form is designed to provide a uniform method for A-E firms to submit information on experience, personnel, capabilities of the A-E firm to perform, along with information on the consultants they expect to collaborate with on the specific project. Hence the need for information regarding the number and discipline of consultant personnel. The degree to which an A-E firm will utilize consultants can significantly impact on their suitability and qualifications for a specific project. The revision to the form requesting A-E firms provide the name and phone number of a point of contact, usually the project manager, will (1) reduce the time required by the Government to verify performance on current Federal contracts, and (2) reduce the time lost by the A-E firms providing this information at a later date. The information is used to determine if a firm is qualified to perform a specific project.

B. Annual Reporting Burden

FOR FURTHER INFORMATION CONTACT: Mr. Jack O'Neill, Office of Federal Acquisition Policy, GSA (202) 501-3856.

SUPPLEMENTARY INFORMATION:

A. Purpose

The clause "Accident Prevention" (48 CFR 52.236-13) requires Federal construction contractors to keep records of accidents incident to work performed under the contract that result in death, traumatic injury, occupational disease

or damage to property, materials, supplies or equipment. Records of personal inquiries are required by OSHA (OMB Control No. 1220-0029). The Federal Acquisition Regulation requires records of damage to property, materials, supplies or equipment to provide background information when claims are brought against the Government.

If the contract involves work of a long duration, the contractor must submit a written proposal for implementation of the clause. The Accident Prevention Plan, for projects that are hazardous or of long duration, is analyzed by the Contracting Officer along with the agency safety representatives to determine if the proposed plan will meet the requirement of the safety regulations and applicable statutes. The records maintained by the contractor are used to evaluate compliance and may be used in workmen's compensation cases. The Accident Prevention Plan is placed in the contract file for reference.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 2 hours per completion, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents, 2,106; responses per respondent, 2; total annual responses, 4,212; preparation hours per response, 2; and total response burden hours, 8,424.

BILLING CODE 5000-04-F

DEPARTMENT OF ENERGY**Electrometallurgical Treatment Research and Demonstration Project in the Fuel Conditioning Facility at Argonne National Laboratory-West Availability of Draft Environmental Assessment and Notice of Public Meetings**

AGENCY: Department of Energy.

ACTION: Notice of availability and public meetings.

SUMMARY: The Department of Energy (DOE) announces the availability of the Draft Environmental Assessment for the Electrometallurgical Treatment Research and Demonstration Project in the Fuel Conditioning Facility at Argonne National Laboratory-West. DOE also announces the dates, times, and locations for public meetings on the Draft EA. The proposed project would be conducted at the Fuel Conditioning Facility at Argonne National Laboratory-West (ANL-W) near Idaho Falls, Idaho, to demonstrate the feasibility of an advanced spent fuel treatment technology using a small quantity of spent nuclear fuel from the Experimental Breeder Reactor-II (EBR-II), which is also located at the ANL-W

site. The purpose of the proposed project would be to assess the reliability and performance of the facility and the process equipment and provide information on the characteristics of the waste forms resulting from the treatment of the fuel.

DATES: Written and oral comments on the Draft EA are invited from the public and other interested parties and organizations. DOE will consider the comments in preparing the final version of the EA. The public comment period will begin on February 5, 1996, and end on March 22, 1996. Written comments should be postmarked by March 22, 1996, to ensure consideration; comments postmarked after that date will be considered to the extent practicable. Public meetings on the Draft EA will be held as follows:

Idaho Falls, Idaho—February 21, 1996, 1:00 p.m. to 4:00 p.m. and 7:00 p.m. to 10:00 p.m., the Shilo Inn, 780 Lindsay Boulevard

Washington, D.C.—February 27, 1996, 1:00 p.m. to 5:00 p.m., Loew's L'Enfant Plaza Hotel, Ballroom D, 480 L'Enfant Plaza, SW

The meetings will provide opportunities for the submittal of oral and written comments as well as for information exchange and discussion.

ADDRESSES: Requests for copies of the Draft EA, written comments on the Draft EA, or other matters regarding this environmental review should be addressed to: Mr. Greg Bass, NEPA Document Manager, Argonne Group-West, U.S. Department of Energy, P.O. Box 2528, Idaho Falls, ID 83403. Mr. Bass may be contacted by telephone at (208) 533-7184 and facsimile at (208) 533-7422.

FOR FURTHER INFORMATION CONTACT: For general information on the DOE NEPA process, contact: Ms. Carol Borgstrom, Director, Office of NEPA Policy and Assistance, EH-42, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, D.C. 20585. Ms. Borgstrom may be contacted by leaving a message at (800) 472-2756 or by calling (202) 586-4600. For general information on the Electrometallurgical Treatment Research and Demonstration Project, contact: Mr. Robert G. Lange, Associate Director, Office of Facilities, NE-40, U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20874. Mr. Lange may be contacted by calling (301) 903-2915.

SUPPLEMENTARY INFORMATION: DOE is preparing an environmental assessment to evaluate the potential environmental impacts of a proposal to conduct research and demonstration at the

Argonne National Laboratory-West (ANL-W) of electrometallurgical technology for the treatment of sodium-bonded spent nuclear fuel. Without some form of treatment, sodium-bonded spent nuclear fuel is unlikely to be suitable for disposal in a geologic repository because the fuel is saturated with sodium, a reactive material. Electrometallurgical treatment of the fuel is expected to stabilize the reactive metallic sodium by converting it to common table salt (i.e., sodium chloride) and allow the fission products to be collected, concentrated, and stabilized together with the transuranic elements for disposal.

The proposed research and demonstration project would be conducted in the Fuel Conditioning Facility at the ANL-W site near Idaho Falls, Idaho. A small quantity of Experimental Breeder Reactor-II (EBR-II) spent nuclear fuel consisting of both driver fuel (highly-enriched uranium fuel that was located in the center of the reactor core to power the reactor) and blanket assemblies (depleted uranium fuel that was located around the periphery of the core to provide shielding for the reactor vessel) would be treated to determine whether electrometallurgical treatment is a feasible management option for sodium-bonded spent nuclear fuel. The proposed project would also assess the reliability and performance of the facility and the process equipment and provide needed information about the waste forms predicted to result from the treatment of the fuel. To achieve these objectives, up to 100 EBR-II spent fuel driver assemblies and 25 irradiated blanket assemblies may be treated.

DOE will distribute copies of the Draft EA to interested members of the public, Congressional members and committees, the State of Idaho, American Indian tribal governments, local county governments, other Federal agencies, and other interested organizations.

Signed in Washington, D.C., this 25th day of January, 1996, for the United States Department of Energy.
