Appalachian Power Company (70-8873)

Appalachian Power Company ("APCo"), 40 Franklin Road, Roanoke, Virginia 24022, a wholly-owned electric utility subsidiary of American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed an application under sections 9 and 10 of the Act and rules 53 and 54 thereunder.

APCo's central machine shop, located in South Charleston, West Virginia ("Shop"), renovated, rebuilds and modifies major pieces of power plant

equipment, such as turbine shells and rotors, pump rotors, motors and similar equipment used by AEP system companies in their power plant generation operations. APCo requests authorization for the Shop to perform work for nonaffiliates of the same type it currently performs for AEP system companies for an initial period through December 31, 2001.

APCo expects that the current annual level of power plant equipment maintenance required by AEP system companies will remain constant in the future. Due to the increasingly cyclical nature of power plant maintenance, APCo proposes to perform work for nonaffiliates during Shop's reduced workload periods, thereby avoiding layoffs of experienced personnel, promoting more efficient use of assets and labor and lowering the average cost of work to user AEP system companies. APCo intends to charge nonaffiliates a price that will include a profit component. Revenues derived from work performed for nonaffiliates would be used to reduce Shop overheads, thereby lowering the cost of maintenance services to AEP system companies.

Since 1990, CSW, directly or through its wholly-owned subsidiary, Energy, has engaged in development activities involving, among other types of facilities, exempt wholesale generators ("EWGs"), as defined in section 32 of the Act. Since 1994, CSW, directly or through its wholly-owned subsidiary, CSWI, has engaged in development and investment activities relating to EWGs and foreign utility companies ("FUCOs"), as defined in section 33 of the Act. By orders of the Commission,¹ CSW is authorized to finance the operations of Energy, CSWI and their respective subsidiaries through acquisitions of securities, capital contributions, open account advances, loans, guarantees and other forms of credit support.
