ENVIRONMENTAL PROTECTION AGENCY

[FRL-5543-3]

Agency Information Collection Activities for Boilers and Industrial Furnaces

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit a continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB) to allow the Agency to continue to collect data for the information requirements for boilers and industrial furnaces burning hazardous waste. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collections as described below.

DATES: Comments must be submitted on or before September 27, 1996.

ADDRESSES: Commenters must send an original and two copies of their comments referencing docket number F-96-FBIP-FFFFF to: RCRA Docket Information Center, Office of Solid Waste (5305G), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 401 M Street, SW., Washington, DC 20460. Deliveries of comments should be made to the Arlington, VA, address listed below. Comments may also be submitted electronically through the Internet to: RCRA-Docket@epamail.epa.gov. Comments in electronic format should also be identified by the docket number F-96-FBIP-FFFFF. All electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

Commenters should not submit electronically any Confidential Business Information (CBI). An original and two copies of CBI must be submitted under separate cover to: RCRA CBI Document Control Officer, Office of Solid Waste (5305W), U.S. EPA, 401 M Street, SW., Washington, DC 20460.

Copies of the draft ICR and public comments and supporting materials are available for viewing in the RCRA Information Center (RIC), located at Crystal Gateway One, 1235 Jefferson Davis Highway, First Floor, Arlington, VA. The RIC is open from 9 a.m. to 4 p.m., Monday through Friday, excluding federal holidays. To review docket materials, the public must make an appointment by calling (703) 603-9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost \$.15/page.

The official record for this action will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into paper form and place them in the official record, which will also include all comments submitted directly in writing. The official record is

the paper record maintained at the above address.

FOR FURTHER INFORMATION CONTACT:

Mary Jo Krolewski, Waste Treatment Branch (5302W), Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (703) 308-7754.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are owners/operators of boilers and industrial furnaces that burn hazardous waste.

Title: Information Requirements For Boilers and Industrial.

Furnaces: General Hazardous Waste Facility Standards, Specific Unit Requirements, and Part B Permit Application and Modification Requirements, EPA ICR #1361, OMB No. 2050-0073.

Abstract: On February 21, 1991 and August 25, 1992, EPA expanded controls on hazardous waste combustion to regulate air emissions from the burning of hazardous waste in boilers and industrial furnaces (BIFs), which were previously unregulated. 40 CFR Part 266, Subpart H established standards for the burning of hazardous waste in BIFs under the authority of the Resource Conservation and Recovery Act (RCRA). 40 CFR 270.22 established Part B application information requirements for BIFs burning hazardous waste, and § 270.66 established permit requirements for BIFs. Owners and operators of BIF facilities must comply with these regulations in addition to other regulations applicable to all hazardous waste facilities.

EPA requires this mandatory information collection to demonstrate that facilities meet the necessary regulatory requirements and to ensure that the environment is adequately protected. Regulations covering BIFs and general hazardous waste facilities are promulgated under authority of RCRA sections 1006, 2002, 3001 through 3007, 3010, and 7004, as amended. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

In fitting with our overall goal to significantly reduce paperwork burden, EPA, in its proposed rule, Revised Standards for Hazardous Waste Combustors (see 61 FR 17358), has made proposals that may result in future reductions to the recordkeeping and reporting burden for BIFs. The proposed rule revises §§ 266.102(e)(10) and

266.103(k), requiring BIFs to maintain files of all information required by §§ 266.102(e)(10) and 266.103(k) for a minimum of 5 years. This revision may result in reduced burden for BIFs because the current BIF regulation requires facilities to maintain information for the life of the facility. These recordkeeping requirements would take effect 6 months from the final publication of the final rule for Revised Standards for Hazardous Waste Combustors.

In addition, EPA is proposing a comparable fuels exclusion (see 61 FR 17459) that could affect the reporting and recordkeeping burden for BIFs. EPA is proposing a comparable fuel exclusion that will exclude from the definition of solid and hazardous waste materials those that meet enumerated specification levels for concentrations of toxic constituents and physical properties. EPA's goal is to develop a comparable fuel specification which is of use to the regulated community but assures that an excluded waste is similar in composition to commercially available fuel that is not regulated under RCRA when burned. One of the benefits that would result from promulgating this type of exemption is the reduction of unnecessary regulatory burden. As a result of the comparable fuels exclusion, EPA believes that the BIF universe regulated under RCRA will decrease because some BIFs are combusting a hazardous waste that would be classified as comparable fuels. Thus, combustors that are no longer regulated as BIFs will no longer have to comply with BIF reporting and recordkeeping requirements, which results in burden reduction. The comparable fuels exemption will take effect 6 months from the final publication of the Revised Standards for Hazardous Waste Combustors.

EPA invites comment on the burden reduction provided by these modifications to the BIF requirements, as well as any other possible sources of burden reduction for BIFs. EPA would also like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: EPA estimates that the total annual respondent burden for all activities covered in this ICR is approximately 554,166 hours. The Agency estimates the number of likely respondents to be 236 and the frequency of their response will be on occasion, depending on the individual reporting or recordkeeping requirement.

The average reporting and recordkeeping burden for facilities with new permitted BIF units are approximately 5,524 hours and 2,547 hours per year, respectively. The average reporting and recordkeeping burden for facilities with existing permitted BIF units are approximately 4,736 hours and 2,545 hours per year, respectively. The average reporting and recordkeeping burden for facilities with existing interim status BIF units are approximately 756 hours and 2,767 hours per year, respectively. These estimates include time for complying with requirements associated with general facility standards, recordkeeping, contingency plan and emergency procedures, closure, financial assurance, and conditions applicable to all permits; specific unit requirements for BIFs; and requirements related to submittal of general and specific unit information in the Part B permit application, and Part B permit modification requirements.

In addition, this burden estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: July 18, 1996.

James Berlow,

Acting Director, Office of Solid Waste.
