Notice of Availability; Biological Criteria: Technical Guidance for Streams and Small Rivers**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice of availability.

SUMMARY: This action announces the availability of the draft document "Biological Criteria: Technical Guidance for Streams and Small Rivers" and the Agency's request for public comment. This document should be used in conjunction with the "Rapid Bioassessment Protocols for Use in Streams and Rivers: Benthic Macroinvertebrates and Fish," 1989, EPA/440/4-89-001. The purpose of this document is to help States develop and use biocriteria for stream and small river surveys. The existing approach to water resource quality assessment will be expanded and enhanced by adding biological integrity measurements and criteria to the physical and chemical parameters now used for ambient assessments. The objective of biocriteria and the Clean Water Act is to restore and maintain the physical chemical and biological integrity of the Nation's waters. In that regard, State and Tribal assessments of stream and small river water quality will be expanded and enhanced so that better management decisions can be made. Use of the technical guidance will also provide consistency to regional databases and promote coordination among the States and Tribes.

DATES: All comments must be postmarked or delivered by hand by October 15, 1996. No facsimiles (faxes) will be accepted.

ADDRESSES: Written comments can be sent to Biological Criteria Clerk, Water Docket MC-4101; Environmental Protection Agency; 401 M Street S.W.; Washington DC. 20460. Comments should be accompanied by any references cited. It is requested that an original and 3 copies of the written comments and enclosures be submitted. A copy of the comments and supporting documents are available for review at EPA's Water Docket at the above address. For access to the Docket materials, call (202) 260-3027 between 9:00 a.m. and 3:30 p.m. for an appointment.

Background Information

In 1989, the Agency began expanding its water quality assessment procedures to include biological water quality criteria in addition to physical and chemical parameters. This information supplements the existing chemical and physical based measurements and water management programs. This guidance document establishes the first combined surface water survey protocol and criteria development guidance for small streams and rivers. This guidance is a prototype upon which others will be predicated, but with obvious modifications to accommodate the characteristics of each particular surface water type. Subsequent guidance documents addressing both survey techniques and criteria development will be written for lakes and reservoirs, estuarine and coastal marine waters, rivers, wetlands, and possibly coral reefs in approximately this order.

Robert Perciasepe,

Assistant Administrator for Water.
