**FOR FURTHER INFORMATION CONTACT:** Shirley D. Howard, New Chemicals Branch, Chemical Control Division (7405), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-447, 401 M St., SW., Washington, DC 20460, (202) 260-3780; e-mail: Howard.sd@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to human health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

EPA hereby approves TME-96-5, TME-96-7, and TME-96-8. EPA has determined that test marketing of these new chemical substances described below, under the conditions set out in the TME applications, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to human health or the environment. Production volume, use, and the number of customers must not exceed that specified in the applications. All other conditions and restrictions described in these applications and in this notice must be met.

A notice of receipt of these applications was not published in advance of approval. Therefore, an opportunity to submit comments is being offered at this time. EPA may modify or revoke the test marketing exemptions if comments are received which cast significant doubt on its finding that these test marketing activities will not present an unreasonable risk of injury.

The following additional restrictions apply to TME-96-5, TME-96-7, and TME-96-8. A bill of lading accompanying each shipment must state that the use of these substances are restricted to that approved in the TMEs. In addition, the applicant shall maintain the following records until five years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substances produced and the date of manufacture.
2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.
3. Copies of the bill of lading that accompanies each shipment of the TME substances.

#### **TME-96-5, TME-96-7, and TME-96-8**

**Date of Receipt:** TME 96-5, July 19, 1996, and TME's 96-7 and 8, July 29, 1996. The extended comment periods will close (insert date 15 days after date of publication in the Federal Register).

**Applicant:** Reichhold Chemicals Inc.  
**Chemical:** (G) Polyurethane Adhesive.  
**Use:** (G) Industrial Adhesive.  
**Production Volume:** Confidential.  
**Number of Customers:** Confidential.  
**Test Marketing Period:** 12 months.

Commencing on first day of commercial manufacture.

**Risk Assessment:** Possible concerns for lung effects and oncogenicity were mitigated by an expected lack of inhalation exposure. EPA identified no significant environmental concerns for

these test market substances. Therefore, the test market activities will not present any unreasonable risk of injury to human health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention cast significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to human health or the environment.

A record has been established for this notice under docket number [OPPT-59354] (including comments and data submitted electronically as described above).
