SUPPLEMENTARY INFORMATION: Pursuant to Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a State agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for use of the herbicide, norflurazon, available as Zorial Rapid 80 from Sandoz Agro, Inc., to control grasses on up to 150,000 acres of Bermudagrass hay fields in Georgia. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, large crabgrass, goosegrass and broadleaf signalgrass invade exposed soil seedbeds in newly sprigged Bermudagrass strands. These weeds were traditionally controlled with simazine; however, in 1987, CIBA-GEIGY canceled the registration use in hay fields rather than incur reregistration cost. Since that time there had not been a registered herbicide that will provide control of weedy annual grasses in Bermudagrass hay fields. Although 2,4-D (Esteron 99C) is registered for preemergence control in newly sprigged forage Bermudagrass, it has not consistently provided season long control of annual grasses. Without a control, these grasses can severely restrict Bermudagrass growth following vegetation propagation, limit production
