

Datum 83. Class E airspace areas designated as 700/1200 foot transition areas are published in Paragraph 6005 of Federal Aviation Administration Order 7400.9D, dated September 4, 1995, and effective September 16, 1996, which are incorporated by reference in 14 CFR 71.1 (58 FR 36298; July 6, 1993). The Class E airspace designations listed in this document would be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes Class E airspace located at Buckland, AK, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing instrument landing and departing procedures. The airport VFR status will change to IFR.

The Federal Aviation Administration has determined that these proposed regulations only involve an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034); February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR Part 71 continues to read as follows:

[Airspace Docket No. 96-AAL-9]

Revision of Class E Airspace; Cold Bay, Nome, and Tanana, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises Class E airspace at Cold Bay, Nome, and Tanana, AK. The development of Global Positioning System (GPS) instrument approach procedures to Runway (RWY) 9 and RWY 2 at Nome Airport, and GPS-B and GPS RWY 6 at Ralph M. Calhoun Memorial Airport, Tanana, AK, have made this action necessary. This revision of the Cold Bay Class E airspace corrects discrepancies found in the legal description and aeronautical charts during an airspace review. The intended effect of this action is to provide adequate controlled airspace for IFR operations at the Nome Airport, Ralph M. Calhoun Memorial Airport, Tanana, AK, and correct the Cold Bay, AK, airspace description and depiction.

EFFECTIVE DATE: 0901 UTC, January 30, 1997.

SUPPLEMENTARY INFORMATION:

History

On July 17, 1996, a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Class E airspace at Cold Bay, Nome, and Tanana, AK, was published in the Federal Register (61 FR 37231). The development of GPS instrument approach procedures to RWY 9 and 2 at Nome Airport, and GPS-B and GPS RWY 6 at Ralph M. Calhoun Memorial Airport, Tanana, AK, have made this action necessary. This revision of the Cold Bay Class E airspace corrects discrepancies found in the legal description and aeronautical charts during an airspace review.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposals were received. Thus, the rule is adopted as written.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designated as airport surface areas are published in Paragraph 6002 of Federal Aviation Administration Order 7400.9D, dated September 4, 1995, and effective September 6, 1996, which are incorporated by reference in 14 CFR 71.1 (58 FR 36298; July 6, 1993). The Class E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) revises Class E airspace located at Cold Bay, Nome, and Tanana, AK, to provide controlled airspace extending upward from 700 feet AGL for aircraft executing instrument landing and departing procedures.

The Federal Aviation Administration has determined that these proposed regulations only involve an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT

Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Establishment of Class E Airspace; Wainwright, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at Wainwright Airport, AK. The development of a Global Positioning System (GPS) instrument approach procedure to Runway (RWY) 4 and 22 at Wainwright Airport has made this action necessary. The airport status will change from a visual flight rules (VFR) to an instrument flight rules (IFR) airport. This intended effect of this action is to provide adequate controlled airspace for IFR operations at Wainwright Airport, AK.

SUPPLEMENTARY INFORMATION:

History

On July 2, 1996, a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Class E airspace at Wainwright was published in the Federal Register (61 FR 34395). The development of GPS instrument approach procedures to RWY 4 and 22 at Wainwright Airport, AK, has made this action necessary.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposals were received. However the proposal was published with incorrect coordinates which have been corrected to read: Wainwright Airport (lat. 70°38'19" N, long. 159°59'52" W). The Federal Aviation Administration has determined that these changes are editorial in nature and will not increase the scope of this rule. Except for the non-substantive changes just discussed, the rule is adopted as written.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designated as 700/1200 foot transition areas are published in Paragraph 6005 of Federal Aviation Administration Order 7400.9D, dated September 4, 1995, and effective September 16, 1996, which are incorporated by reference in 14 CFR 71.1 (58 FR 36298; July 6, 1993).
