PCBs: Cancer Dose-Response Assessment and Application to Environmental Mixtures**AGENCY:** Environmental Protection Agency.**ACTION:** Notice of availability of final document.

SUMMARY: This notice announces the availability of a final report titled, PCBs: Cancer Dose-Response Assessment and Application to Environmental Mixtures (EPA/600/P-96/001F). The National Center for Environmental Assessment (NCEA) of the Office of Research and Development developed this report. **ADDRESSES:** The document will be available on the Internet at <http://www.epa.gov/ORD/WebPubs> or for purchase from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; telephone 703-487-4650; facsimile 703-321-8547. The NTIS order number is PB97-104616. Copies will be available for inspection at the U.S. Environmental Protection Agency (EPA) headquarters and regional libraries and through the U.S. Government Depository Library program. The EPA Headquarters Library is located at 401 M Street, S.W., Washington, DC; the library is open Monday through Friday between 10:00 a.m. and 2:00 p.m., except for Federal holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Jim Coglian, National Center for Environmental Assessment/Washington Office (8602), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460. Telephone: 202-260-3830; facsimile: 202-260-3803; E-mail: cogliano.jim@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: The report updates the cancer dose-response assessment for polychlorinated biphenyls (PCBs) and shows how information on toxicity, disposition, and environmental processes can be considered together to evaluate health risks from PCB mixtures in the environment. Processes that chemically change PCB mixtures after release into the environment need to be considered in assessing the mixtures. Thus, guidance is given on applying a range of dose-response parameters to different exposure routes, partial lifetime exposure, and mixtures of varying composition. Intended to be brief, the document focuses on analysis and interpretation rather than a compilation of study results. The PCB report was reviewed at a public, external peer review workshop in May 1996. The

review panel included experts on the carcinogenicity of PCBs from the private sector, academia, states, and other federal health agencies. This final report has been reviewed and approved by EPA's consensus review panel for inclusion on EPA's on-line Integrated Risk Information System (IRIS). A revised cancer information summary file, reflecting the quantitative and qualitative information in the final PCB report, has been loaded onto IRIS.

Dated: October 22, 1996.

Robert J. Huggett,

Assistant Administrator for Research and Development.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications

must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 29, 1996.
