[NAFTA-1132]

Dale Electronics, Inc., Bradford Electronics, Bradford, Pennsylvania; Notice of Revised Determination on Reconsideration

On August 14, 1996, the Department issued a Negative Determination Regarding Eligibility to Apply for NAFTA-Transitional Adjustment Assistance, applicable to all workers of Dale Electronics, Bradford Electronics located in Bradford, Pennsylvania. The notice was published in the Federal Register on September 13, 1996 (61 FR 48505).

By letter of September 27, 1996, the petitioners requested administrative reconsideration of the Department's findings. The petitioners presented new evidence that was not considered in the original determination. Additional new evidence was subsequently transmitted to the Department by officials of Dale Electronics in Bradford.

The workers at Dale Electronics produce electronic components. The initial NAFTA-TAA petition for workers at Dale Electronics was denied because criteria (3) and (4) of the Group Eligibility Requirements of Section 250 the Trade Act of 1974, as amended were not met. There was no shift in production of electronic components from Bradford Electronics to Mexico or Canada, nor did the subject firm import electronic components. Layoffs at the Bradford plant were attributable to the transfer of production to other domestic plants.

New findings on reconsideration show that the company does import electronic components. Other new findings on reconsideration reveal that the company is shifting production of electronic components to Mexico.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports from Mexico and Canada of articles like or directly competitive with electronic components contributed importantly to the declines in sales or production and to the total or partial separation of workers at Dale Electronics, Bradford Electronics, Bradford, Pennsylvania. In accordance with the provisions of the
