

Sea-Land Service, Inc.
Yangming Marine Transport Corp.

Synopsis: Notice is hereby given that the Federal Maritime Commission, pursuant to section 6(d) of the Shipping Act of 1984 (46 U.S.C. app. 1701-1720) has requested additional information from the parties to the Agreement in order to complete the statutory review of Agreement No. 203-011223-014 as required by the Act. This action extends the review period as provided in section 6(c) of the Act.

Dated: November 22, 1996.

By Order of the Federal Maritime Commission.

Joseph C. Polking,
Secretary.

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30 DAY-23]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Office on (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

The following requests have been submitted for review since the last publication date on November 6, 1996.

Proposed Projects

1. Studies of Adverse Reproductive Outcomes in Female Occupational Groups—(0920-0367)—Revised—An estimated 50,000 to 60,000 chemicals are in common use throughout society today and hundreds of new chemicals are introduced each year. Yet the list of environmental chemicals and agents that have been investigated to determine whether they have adverse effects on reproductive health is still limited. With the growing number of women in the

work force, it is becoming increasingly important to evaluate the potential female reproductive health effects of occupational and physical agents.

In this program, NIOSH is planning to undertake a series of five studies to focus on potential reproductive effects of chemical and physical agents in the workplace. In the studies planned under this program, the reproductive health of a group of female workers exposed to the agent of interest, will be compared to the reproductive health of a group of working women with no occupational exposure to known or suspected reproductive toxicants.

For all studies, data from company personnel records containing demographic, and work history information will be used to estimate workplace exposures. Each woman will be asked to complete a telephone questionnaire on reproductive history and other factors (such as cigarette smoking) that may influence reproductive function. Each questionnaire will take approximately 60 minutes to complete. Medical records will be requested to confirm adverse reproductive outcomes reported by the participants. The risk of adverse reproductive outcomes between the two groups of women will then be compared.

The first study to be conducted under this program will be a study of reproductive disorders among female flight attendants. Approximately 66,000 flight attendants are currently employed by U.S. commercial airlines and are potentially exposed to ionizing radiation and disruption of circadian rhythms, two exposures that may adversely affect reproductive function. The other studies to be conducted under this program have not yet been determined. The total annual burden is 6,800.

Respondents	Number of respondents	Number of responses/respondent	Average burden/re-sponse (in hrs.)
Workers	6,200	1	1

2. National Hospital Discharge Survey—(0920-0212)—Extension. The National Hospital Discharge Survey (NHDS), which has been conducted continuously by the National Center for Health Statistics, CDC, since 1965, is the principal source of data on inpatient utilization of short-stay, non-Federal hospitals and is the only annual source of nationally representative estimates on the characteristics of discharges, the lengths of stay, diagnoses, surgical and non-surgical procedures, and the patterns of use of care in hospitals in various regions of the country. It is the benchmark against which special programmatic data sources are compared. Data collected through the NHDS are essential for evaluating health status of the population, for the planning of programs and policy to elevate the health status of the Nation, for studying morbidity trends, and for research activities in the health field. NHDS data have been used extensively in the production of goals for the Year 2000 Health Objectives and the subsequent monitoring of these goals. In addition, NHDS data provide annual updates for numerous tables in the Congressionally-mandated NCHS report, *Health, United States*. Data for the NHDS are collected annually on approximately 275,000 discharges from a nationally representative sample of noninstitutional hospitals, exclusive of Federal, military and Veterans' Administration hospitals. The data items collected are the basic core of variables contained in the Uniform Hospital Discharge Data Set (UHDDS). Data for approximately half of the responding hospitals are abstracted from medical records while the remainder of the hospitals supply data through commercial abstract service organizations, state data systems, in-house tapes or printouts. There is no actual cost to respondents since hospital staff who actively participate in the data collection effort are compensated by the government for their time. The total annual burden is 2,513.

Respondents	Number of respondents	Number of responses/respondent	Average burden/re-sponse (in hrs.)
Medical Record Abstracts Primary Procedure Hospitals	77	250	0.0833
