SUPPLEMENTARY INFORMATION: The purpose of this meeting will be to provide an open discussion of the current state of the science and a review of technological and safety factors, relating to fresh juices from farm to table. While this is the primary focus of the meeting, there will also be consideration of issues and data pertaining to *E. coli* O157:H7, which caused the recent foodborne disease outbreak from apple juice, and to other pathogenic bacterial strains, e.g., *Salmonella* spp.

This meeting is of special interest to the fruit and vegetable industry, public health associations, and health agencies of state and local governments. It will provide an opportunity to consider how FDA's regulatory program relative to fresh juice and juice products needs to be revised; to discuss and exchange information on all relevant safety considerations; to identify research needs; to consider whether additional consumer education is necessary; and to consider what other measures are needed to reduce the risk of future outbreaks.

The agenda will include presentations on such topics as: (1) Background of the October 1996 outbreak, (2) fruit juice associated outbreaks, (3) juice industry practices, (4) growing and harvesting practices, (5) organic production, (6) emerging pathogens, (7) specific microbial concerns, and (8) labeling issues.

The agency is interested in learning about all aspects of juice production and distribution. Both oral and written comments are encouraged on the following topics: (1) Appropriate good manufacturing practices (GMP's) for the production of fresh juices, (2) identification of critical control points in juice processing under a Hazard Analysis and Critical Control Point System, (3) whether pasteurization of fresh juices is appropriate or necessary, (4) sanitizers that are available to control pathogens of concern, (5) alternative available food additives that will ensure safety, (6) any new technologies/ intervention strategies

that are becoming available that appear to be effective in the control of *E. coli* O157:H7 or other pathogens of concern, and (7) the advice that should be given to consumers.

The agency is encouraging individuals with information and data on these topics to present their comments at the meeting or in writing. Transcripts of the public meeting may be requested in writing from the Freedom of Information Office (HFI-35), Food and Drug Administration, 5600 Fishers Lane, rm. 12A-16, Rockville, MD 20857, approximately 15 working days after the meeting at a cost of 10 cents per page. The transcript of the public meeting and all submitted comments will be available for public examination at the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.
