

the District Manager, Battle Mountain District, 50 Bastian Way, Box 1420, Battle Mountain, NV 89820.

Classification Comments: Comments may be made regarding the suitability of the land for the sewage treatment facility. Comments on the classification are restricted to whether the land is physically suitable for the proposal, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the conveyance application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for a sewage treatment facility.

Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification will become effective 60 days from the date of publication of this notice in the Federal Register. The lands will not be conveyed until after the classification is effective.

Dated: February 5, 1996.

Gerald M. Smith,  
District Manager.

## Bureau of Reclamation

### San Diego County Water Authority and City of San Diego's Water Repurification Project

**AGENCY:** Bureau of Reclamation, Interior and San Diego County Water Authority as Joints Leads for the Proposed Action.

**ACTION:** Notice of intent to prepare a draft environmental impact statement and notice of scoping meeting(s) for San Diego County Water Authority and City of San Diego's water repurification project.

**SUMMARY:** San Diego's Water Repurification Project involves the further treatment of about 20 million gallons per day of tertiary treated reclaimed water and transportation of this water to the City of San Diego's San Vicente Reservoir. Treatment of this water would occur at the North City Water Reclamation Plant (currently under construction), which upon completion, will treat waste water to tertiary levels. It is proposed to construct advanced water purification facilities at the North City Plant, which would treat the tertiary water from that plant to a level of purity which would allow the water to be stored in San Vicente Reservoir. At present, two potential alternatives pipeline routes from the North City Water Reclamation Plant to the reservoir have been identified: a northern route and a southern route. Specific locations for these potential routes have not as yet been determined. They, along with other reasonable routes, will be specified in the Draft Environmental Impact Statement. The repurified water would be stored in San Vicente Reservoir where it would mix with other water for eventual potable use. When needed, water from this reservoir would be pumped to the Alvarado Water Filtration Plant where the water would be treated prior to being distributed for potable water use.

**DATE AND ADDRESSES:** Scoping meetings are proposed for the project. However, the schedule and location of these scoping meetings have not as yet been determined. There will be ample notice given in the local papers of the times and locations of all scoping meetings.
