## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### Availability of Draft Recovery Plan for a Plant, Fringed Campion, for Review and Comment

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of document availability and public comment period.

**SUMMARY:** The Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for fringed campion (*Silene polypetal*), an endangered plant native to hardwood

forests in central Georgia and on the Flint-Appalachicola bluffs at the southern border of Georgia and adjoining Florida. The Service solicits review and comment from the public on this draft plan.

**DATES:** Comments on the draft recovery plan must be received on or before February 25, 1997 to receive consideration by the Service.

**ADDRESSES:** Persons wishing to review the draft recovery plan may obtain a copy by contacting the Field Supervisor, Jacksonville Field Office, Fish and Wildlife Service, 6620 Southpoint Drive South, Suite 310, Jacksonville, Florida 32216 (Telephone: 904-232-2580, FAX 904-232-2404). Written comments and materials regarding the plan should be addressed to the Field Supervisor, at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

**FOR FURTHER INFORMATION CONTACT:** Linda Finger at the above address (Telephone: 904-232-2580 ext. 107).

**SUPPLEMENTARY INFORMATION:**

**Background**

Restoring endangered or threatened plants and animals to the point where they are secure self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting species, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice, and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will take these comments into account in the course of implementing approved recovery plans.

Fringed campion inhabits hardwood bottoms and ravines in a very limited geographic range. As a result, it was

probably comparatively rare even before the time of European contact. The greatest threat to this forest species is the progressive alteration or degradation of its habitat due to logging. The resultant increased sunlight, lack of replenishment of the humus layer, and growth of aggressive exotic weeds such as Japanese honeysuckle, act in concert to eliminate this species. Browsing of flowering stems by deer impact reproduction by seed.

The actions needed to recover this species are: 1) Protect populations. 2) Preserve genetic stock from acutely threatened populations. 3) Monitor populations to determine trends and developing threats. 4) Control exotic pest plants. 5) Search for additional populations. 6) Reestablish fringed campion at protected locations, if necessary. 7) Manage sites to maintain and/or enhance populations. Most opportunities to conserve this plant will be on private land because only two sites are in public ownership and no public land acquisition is contemplated. Landowners are not obliged in any way to conserve the plant on their property.

**Public Comments Solicited**

The Service solicits written comments on the recovery plan. All comments received by the date specified above will be considered prior to the approval of the plans.

**Authority**

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: December 10, 1996.

David Hankla,  
*Field Supervisor.*

**U.S. Fish and Wildlife Service**

**Availability of a Draft Programmatic Environmental Impact Statement on Impacts of Artificial Salmon and Steelhead Production Strategies in the Columbia Basin**

**AGENCIES:** U.S. Fish and Wildlife Service, (lead agency), National Marine Fisheries Service, Bonneville Power Administration (cooperating agencies).

**ACTION:** Notice of availability and schedule of public workshops.

**SUMMARY:** This notice advises the public that the U.S. Fish and Wildlife Service (Service), the National Marine Fisheries Service (NMFS) and the Bonneville Power Administration (BPA) have issued a draft Programmatic

Environmental Impact Statement (PEIS) on Impacts of Artificial Salmon and Steelhead Production Strategies in the Columbia Basin. The draft PEIS frames the policy level issues associated with the agencies' proposals to change salmon and steelhead fish hatchery production in Columbia Basin and discusses the cumulative impact issues within the basin's salmon and steelhead mainstem migration corridor. This notice is being furnished pursuant to the Council on Environmental Quality Regulations for Implementing The Procedural Provisions of the National Environmental Policy Act (NEPA) Regulations (40 CFR 1506.6).

**DATES:** Written comments are requested by February 10, 1997.

Three public informational workshops have been scheduled to explain the proposals and receive comments. All of the workshops will be held from 1:00 pm to 5:00 pm and 7:00 pm to 9:00 pm.

January 14, 1997, Red Lion—

Downtown, Boise, Idaho

January 16, 1997, Red Lion Inn, Pasco, Washington

January 21, 1997, Red Lion Hotel—  
Lloyd Center, Portland, Oregon

**ADDRESS WRITTEN COMMENTS:** Send comments to PEIS Team Leader, U.S. Fish and Wildlife Service, 911 NE 11 Ave, Portland, Oregon, 97232-4181.

**FOR FURTHER INFORMATION CONTACT:** Lee Hillwig, U.S. Fish and Wildlife Service, Telephone: 503-872-2766 or Dave Riley, Telephone: 503-226-2460.

Copies of the Draft PEIS are available for review at the following libraries:

Astoria Public Library, Astoria, Oregon  
Deschutes County Library, Bend,

Oregon

Hood River County Library, Hood River, Oregon

King County Library System, Seattle, Washington

Multnomah County Library, Portland, Oregon

North Central Regional Library, Wenatchee, Washington

Seattle Public Library, Seattle, Washington

Yakima Valley Regional Library, Yakima, Washington

**SUPPLEMENTARY INFORMATION:** Columbia Basin fish managers continue to struggle to meet a variety of fishery obligations and mandates that often compete for scarce resources. Management of fish hatcheries is one of many factors affecting overall fish populations within the basin. In recognition of the need to develop a systemwide salmon and steelhead artificial production strategy in the Columbia Basin that better
