ACTION: Advance notice of proposed rulemaking; withdrawal.

SUMMARY: We are soliciting public comment on the need for and appropriate standards for the establishment of permanent private quarantine facilities for horses imported into the United States. We are also giving notice that we are withdrawing a previously published proposed rule that would have allowed the operation of permanent private quarantine facilities for horses, added new requirements for approval of temporary private quarantine facilities for horses, and required the government to collect payment from each privately operated quarantine facility for services provided by the government at the facility.

DATES: Consideration will be given only to comments received on or before April 26, 1996.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 95-084-1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737-1238. SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 92 (referred to below as the regulations) govern the importation into the United States of specified animals and animal products in order to prevent the introduction into the United States of various communicable diseases. The regulations require that certain animals be quarantined upon arrival in the United States as a condition of importation. There are two types of quarantine facilities for animals being imported into the United States: Government operated facilities and privately operated facilities. The regulations contain requirements for the approval of temporary private quarantine facilities for horses; however, the regulations do not provide for the approval of permanent private quarantine facilities for horses.

Withdrawal of Previous Proposal

On September 6, 1989, we published in the Federal Register (54 FR 36986-36996, Docket No. 85-061) a proposed rule that would have allowed the operation of permanent private quarantine facilities for horses, added new requirements for approval of temporary private quarantine facilities for horses, and required the government to collect payment from each privately operated quarantine facility for services provided by the government at the facility. However, on August 2, 1990, we published in the Federal Register (55 FR 31484-31562, Docket No. 90-023) a final rule that reorganized all of part 92, including those sections concerning quarantine facilities for horses, so that the proposed provisions are no longer consistent with the current part 92 format. In addition, because of the amount of time that has elapsed since publication of the proposed rule, some of the proposed provisions may no longer be appropriate. For these reasons, we are withdrawing the proposed rule and reopening public discussion of the issues.

Comments Requested

There appears to be occasional public demand for quarantine services for horses other than those available at existing federal facilities. It also appears that temporary private quarantine facilities may not be able to fill this demand because such facilities are established, approved, and operated by importers to handle horses imported for a particular event. We are requesting comments on the need for permanent private quarantine facilities for horses. We are also requesting comments on appropriate specific standards for the establishment of permanent private quarantine facilities for horses in order to meet any existing unfulfilled demand for quarantine services.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class E airspace area at Auburn, CA. The development of GPS SIAP at Auburn Municipal Airport has made this proposal necessary. The intended effect of this proposal is to provide adequate Class E airspace for aircraft executing the Instrument Departure Procedure and the GPS RWY 7 SIAP at Auburn Municipal Airport, Auburn, CA. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
