SUPPLEMENTARY INFORMATION: Pursuant to Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a state agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of chlorfenpyr on cotton to control beet armyworm. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, three primary factors have brought about this situation. These are: (1) the resistance to registered alternative pesticides causing control failures when these products are applied on cotton to control BAW; (2) the weather conditions consisting of mild winters and unusually dry hot weather were conducive to a BAW outbreak, and (3) BAW infesting cotton in unusually large numbers. The yield losses due to infestations of beet armyworms in cotton on a field by field basis have ranged from 0 percent with light populations to 100 percent, due to the crop being completely devoured or the grower abandoning the field. Combining estimates from the Texas Agricultural Extension Entomologists from the various areas of infestation, at least 40 percent yield losses may occur on approximately 35 percent of the cotton acreage in the requested sites. These yield losses will result in significant economic losses for the cotton producers.

Under the proposed exemptions, Pirate 3SC may be applied no more than 2 applications during the growing season, not to exceed the rate of 0.4 lbs a.i. (17.06 fluid ozs.) per acre using ground or aerial equipment.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide), [40 CFR 166.24 (a)(1)]. Such notice provides for opportunity for public comment on the application.

A record has been established for this notice under docket number [OPP-180991] (including comments and data

The Applicant has requested the Administrator to issue a specific exemption for the use of chlorfenpyr on cotton to control beet armyworm. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, this request is based on the history of beet armyworm infestations throughout South Carolina in past years and the economic losses suffered as a result of those outbreaks. Typically, those outbreaks have occurred in late planted cotton (late May and June planting dates). Research has shown that cotton planted after May 15 will generally suffer a significant yield reduction compared with earlier planted cotton.

Under the proposed exemptions, Pirate 3SC may be applied at the rate of 0.4 lbs a.i. (17.06 fluid ozs.) per acre using ground or aerial equipment. Product may be applied no more than 2 applications during the growing season (not to exceed 0.4 lbs a.i. per acre).

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide), [40 CFR 166.24 (a)(1)]. Such notice provides for opportunity for public comment on the application.
