SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to human health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury

EPA hereby approves TME-97-7 and TME-97-8. EPA has determined that test marketing of the new chemical substances described below, under the

conditions set out in the TME applications, and for the time periods and restrictions specified below, will not present an unreasonable risk of injury to human health or the environment. Production volume, use, and the number of customers must not exceed that specified in the applications. All other conditions and restrictions described in the applications and in these notices must be met.

Notice of receipt of these applications was not published in advance of approval. Therefore, an opportunity to submit comments is being offered at this time. EPA may modify or revoke the test marketing exemptions if comments are received which cast significant doubt on its finding that these test marketing activities will not present an unreasonable risk of injury.

The following additional restrictions apply to TME-97-7 and TME-97-8. A bill of lading accompanying each shipment must state that the use of the substances are restricted to that approved in the TMEs. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

- 1. Records of the quantity of the TME substances produced and the date of manufacture.
- 2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.
- 3. Copies of the bill of lading that accompanies each shipment of the TME substances.

TME-97-7 and TME-97-8

Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market activities will not present any unreasonable risk of injury to human health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention cast

significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to human health or the environment.
