**CNG Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff**

July 3, 1997.

Take notice that on July 1, 1997, CNG Transmission Corporation (CNG) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, certain revised tariff sheets listed in Appendix A to the filing and certain pro forma tariff sheets listed in Appendix B to the filing. CNG proposes that the Appendix A tariff sheets become effective August 1, 1997, and that the Appendix B tariff sheets become effective prospectively upon Commission approval.

CNG states that the proposed general rate case changes will increase jurisdictional revenues by approximately \$71.1 million based upon a 12-month period ended March 31, 1997, adjusted for changes that are known and measurable and that will become effective during the nine-month test period ending December 31, 1997. CNG states that the principal factors supporting the adjustment in rates are an increase in rate base due to additional plant investment, increases in operation and maintenance expenses, an increase in the return allowance on the company's rate base, an increase in the depreciation rate for the company's computers, and increases in other taxes.

CNG states that its filing is an integrated package of tariff changes, service enhancements, and pricing mechanisms that are designed to better serve CNG's customers in a competitive marketplace.

CNG proposes prospectively to implement market based pricing on its

system for all services under Rate Schedules IT and MCS and under a new rate schedule, Rate Schedule MBA. CNG proposes to provide firm transportation and storage service at market based prices under Rate Schedule MBA, in conjunction with Rate Schedules FT, GSS, GSS-II, and OSS for new contracts under those rate schedules with a primary term of less than five years (i.e., all new contracts for firm services under these rate schedules with a term of less than five years and all extensions or roll-overs of existing contracts with a term of less than five years). Thus, CNG states that it does not propose to implement market based rates for the primary term of existing long-term agreements. CNG does propose to implement market based prices for all short-term services (i.e., short-term firm transportation service, and services under Rate Schedules IT and MCS) immediately upon Commission approval.

CNG states that copies of the filing have been served upon its affected customers and interested State Commissions.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's rules and regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.
