

actions which do not individually or cumulatively have a significant effect on the human environment. Categorical exclusions are not the equivalent of statutory exemptions. If exceptions to categorical exclusions apply, under 516 DM 2, Appendix 2 of the Departmental Manual, the departmental categorical exclusions cannot be used. Among the types of actions available for a Categorical Exclusion is for a "low effect" HCP/incidental take permit application. A "low effect" HCP is defined as an application that, individually or cumulatively, has a minor or negligible effect on the species covered in the HCP [Section 1.4(C)(2)].

The Service may consider the Applicant's project and HCP such a Categorical Exclusion. The Service is soliciting for public comments on this determination. Based upon public comments, the Service may make a final determination that this action is categorically excluded.

The Service has made a preliminary determination that the issuance of the ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of NEPA. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and HCP. An appropriate excerpt from the FONSI reflecting the Service's finding on the application is provided below:

Based on the analysis conducted by the Service, it has been determined that:

1. Issuance of an ITP would not have significant effects on the human environment in the project area.
2. The proposed take is incidental to an otherwise lawful activity.

3. The Applicant has minimized impacts on the project site to the extent practicable.

4. Other than impacts to the threatened species as outlined in the documentation of this decision, the indirect impacts which may result from issuance of the ITP are addressed by other regulations and statutes under the jurisdiction of other government entities. The validity of the Service's ITP is contingent upon the Applicant's compliance with the terms of the permit and all other laws and regulations under the control of State, local, and other Federal governmental entities.

The Service will also evaluate whether the issuance of a Section 10(a)(1)(B) ITP complies with Section 7 of the Act by conducting an intra-Service Section 7 consultation. The results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.

Acting Regional Director.
