

boundary changes or to correct errors without having to create unique sliver census tracts for such areas.

Definitions of Key Terms

Alaska Native Regional Corporation (ANRC)—A corporate entity established under the Alaska Native Claims Settlement Act of 1972, Public Law 92-203, as amended by Public Law 92-204, to conduct both the business and nonprofit affairs of Alaska Natives. Twelve ANRCs cover the entire State of Alaska except for the Annette Islands Reserve.

Alaska Native village statistical area (ANVSA)—A statistical entity containing the densely settled extent of an Alaska Native village that constitutes an association, band, clan, community, group, tribe, or village recognized pursuant to the Alaska Native Claims Settlement Act of 1972, Public Law 92-203, as amended by Public Law 92-204.

American Indian reservation (AIR)—A Federally recognized American Indian entity with boundaries established by treaty, statute, and/or executive or court order and over which American Indians have governmental jurisdiction. Along with reservations, designations such as colonies, communities, pueblos, rancherias, and reserves apply to American Indian reservations.

Block numbering area (BNA)—A small-area, statistical geographic division of a county or statistically equivalent area delineated in 1990 instead of and generally geographically equivalent to census tracts. For Census 2000, the Census Bureau is merging the BNA program into the census tract program.

Coastal water—Water bodies between territorial seas and inland water, the encompassing headlands being more than one mile apart and less than 24 miles apart.

Conjoint—A description of a boundary shared by two adjacent geographic entities.

Continuous—A description of areas sharing common boundaries, such that the areas, when combined, form a single piece of territory. Discontinuous areas form disjoint pieces.

Crews-of-vessels census tract—A census tract created at the time of enumeration for allocating the shipboard population of merchant and military ships and identified with a special numeric suffix equal to .99.

Great Lakes' waters—Water area beyond one mile wide headland embayments located in any of the five Great Lakes: Erie, Huron, Michigan, Ontario, or Superior.

Incorporated place—A type of governmental unit, sanctioned by state law as a city, town (except in New England, New York, and Wisconsin), village, or borough (except in Alaska and New York), having legally prescribed limits, powers, and functions.

Inland water—Water bodies entirely surrounded by land or at the point where their opening to coastal waters, territorial seas, or the Great Lakes is less than one mile across.

Minor civil division (MCD)—The primary governmental or administrative division of a county in 28 states, Puerto Rico and the Island Areas having legal boundaries, names, and descriptions. MCDs represent many different types of legal entities with a wide variety of characteristics, powers, and functions depending on the state and type of MCD. In some states, some or all of the incorporated places also constitute MCDs.

Nonvisible feature—A map feature that is not visible on the ground such as a city or county boundary through space, a property line, a short line-of-sight extension of a road, or a point-to-point line of sight.

Special place—A specific location requiring special enumeration because the location includes people not in households or the area includes special land use. Special places include facilities with resident populations,

such as correctional institutions, military installations, college campuses, workers' dormitories, hospitals, nursing homes, group homes, and land-use areas such as national parks. A special place includes the entire facility, including nonresidential areas and staff housing units, as well as all group quarters population.

Territorial seas—Water bodies not included under the rules for inland water, coastal water, or Great Lakes' waters, see above.

Visible feature—A map feature that one can see on the ground such as a road, railroad track, above-ground transmission line, stream, shoreline, fence, sharply defined mountain ridge, or cliff. A nonstandard visible feature is a feature that may not be clearly defined on the ground (such as a ridge), may be seasonal (such as an intermittent stream), or may be relatively impermanent (such as a fence). The Census Bureau generally requests verification that nonstandard features pose no problem in their location during field work.

Certain Cut-to-Length Carbon Steel Plate From Finland: Amended Final Determination of Sales at Less Than Fair Value

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final court decision and amended final determination of sales at less than fair value.

EFFECTIVE DATE: October 28, 1997.

FOR FURTHER INFORMATION CONTACT:

Daniel Manzoni or David J. Goldberger, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482-1121 or (202) 482-4136, respectively.

SUMMARY: On May 13, 1997, the Court of International Trade affirmed the Department of Commerce's final remand results in *Rautaruukki Oy v. United States*, Consol. Court No. 93-09-00560-AD, arising out of the Department's final determination of sales at less than fair value in the antidumping investigation of certain cut-to-length carbon steel plate from Finland. As there is now a final and conclusive court decision in this action, we are amending our final determination of sales at less than fair value and we will instruct the U.S. Customs Service to change the appropriate cash deposit rate.

SUPPLEMENTARY INFORMATION:

Background

On July 9, 1993, the Department of Commerce (the Department) published its final determination in its investigation of sales at less than fair value (LTFV) of certain cut-to-length carbon steel plate from Finland (58 FR 37122). On August 19, 1993, the Department published an amended final determination (58 FR 44165).

Subsequently, respondent *Rautaruukki Oy* and petitioner *Inland Steel Industries, Inc.*, and a number of other interested parties, filed lawsuits with the Court of International Trade (the Court) challenging the final determination. On March 31, 1995, the Court remanded the case to the Department and ordered the Department to recalculate the value added tax (VAT) according to the Department's new methodology. See *Rautaruukki Oy v. United States*, Slip Op. 95-56, (CIT, March 31, 1995). Specifically, the Court ordered that the Department revise its dumping margin calculation by multiplying the Finnish VAT rate by United States price (USP) and then increasing USP by the resulting amount.

On remand, in accordance with *Federal-Mogul Corp. and The Torrington Co. v. United States*, Slip Op. 93-194 (CIT, October 7, 1993), the Department recalculated the margins in this case by applying the foreign market tax rate to the price of the United States merchandise at the same point in the chain of commerce that the foreign market tax was applied to foreign market sales.

On May 13, 1997, the Court affirmed the final remand results. See *Rautaruukki Oy v. United States*, Slip Op. 97-56 (CIT, May 13, 1997). As there is now a final and conclusive court
