DEPARTMENT OF ENERGY

Notice of Intent To Prepare an Environmental Impact Statement for the Advanced Mixed Waste Treatment Project at the Idaho National Engineering and Environmental Laboratory, Idaho Falls, ID

AGENCY: Department of Energy.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The Department of Energy (DOE) intends to prepare an Environmental Impact Statement (EIS) and conduct a public scoping process for a proposal to construct and operate a facility known as the Advanced Mixed Waste Treatment Project (AMWTP) at the Idaho National Engineering and Environmental Laboratory (INEEL). Under the terms of a 1995 Court Order/Settlement Agreement with the State of Idaho in the case of *Public Service Co. v. Batt*, Civil No. 91-0035-S-EJL (D. Idaho) (Lead case), DOE agreed to

procure a treatment facility for mixed low-level waste, transuranic waste and alpha-contaminated mixed low-level waste, and to treat transuranic waste that requires treatment so as to permit disposal outside of the State of Idaho at the Waste Isolation Pilot Plant in New Mexico or other acceptable disposal facility. DOE also needs to manage DOE alpha-contaminated mixed low-level waste, transuranic waste, and mixed low-level waste in a manner that will comply with applicable laws and requirements, and protect the environment and the health and safety of the workers and the public in a cost-effective manner. The AMWTP EIS will assist the Department in making the necessary decisions to comply with the Settlement Agreement and other applicable requirements for these wastes.

DOE's proposed action is to implement a proposal from British Nuclear Fuels Limited, Inc. (BNFL) to construct and operate the AMWTP at the INEEL. The AMWTP, as proposed by BNFL, would retrieve, sort, characterize, and treat mixed low-level waste and approximately 65,000 cubic meters of alpha-contaminated mixed low-level waste and transuranic waste currently stored at the INEEL Radioactive Waste Management Complex, and package the treated waste for shipment off site for disposal. The AMWTP would employ thermal treatment processes (incineration and vitrification) and also treat similar wastes generated by ongoing INEEL activities and activities at other DOE sites.

This EIS will make use of previously developed information and analyses by "tiering" from other environmental impact statements, including: (1) the Department of Energy Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs Final EIS (SNF & INEL EIS) (DOE/EIS-0203-F), issued April 1995; (2) the DOE Waste Management Programmatic Environmental Impact Statement (WM PEIS) (DOE/EIS-0200-F), issued May 1997; and (3) the Waste Isolation Pilot Plant Disposal Phase Final Supplemental Environmental Impact Statement (SEIS-II) (DOE/EIS-0026-S-2), issued September 1997. DOE will conduct two public scoping workshops and welcomes public comment on the scope of the proposed EIS.

DATES: The public scoping period begins with the publication of this Notice in the **Federal Register**. DOE invites other Federal agencies, Native American

tribes, State and local governments and the general public to comment on the scope of this EIS. DOE must receive scoping comments by January 9, 1998, to ensure consideration, although DOE will consider comments received after that date to the extent practicable.

Two public workshops will be held during this scoping period:

December 4, 1997—Borah High School, 6001 Cassia, Boise, ID; 6:30 pm–9:00 pm

December 9, 1997—Taylorview Junior High School, 350 Castlerock Lane, Idaho Falls, ID; 6:30 pm–9:00 pm

These workshops will provide the public with information about the proposed project and an opportunity to comment on the scope of the EIS, including the reasonable alternatives and issues that the Department should consider. Written comments may be submitted to DOE at these workshops, sent by facsimile to (208) 526-0598, or mailed to the EIS Document Manager, Mr. John E. Medema, at the address listed below.

ADDRESSES: Written comments on this EIS should be sent to: Mr. John E. Medema, Document Manager, Advanced Mixed Waste Treatment Project EIS, U.S. Department of Energy, Idaho Operations Office, 850 Energy Drive, MS 1117, Idaho Falls, ID 83402, Facsimile: (208) 526-0598.

FOR FURTHER INFORMATION CONTACT: To request information about this EIS, or to be placed on the EIS document distribution list, please call the 24-hour toll-free information line at 1-800-708-2680.

For general information about the DOE National Environmental Policy Act (NEPA) process, please contact: Carol Borgstrom, Director, Office of NEPA Policy and Assistance (EH-42), U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, D.C. 20585-0119, Phone: (202) 586-4600, Messages: (800) 472-2756, Facsimile: (202) 586-7031.

SUPPLEMENTARY INFORMATION:

Background and Purpose and Need for Agency Action

Approximately 25,000 cubic meters of alpha-contaminated low-level waste and 40,000 cubic meters of transuranic waste are currently stored at the Radioactive Waste Management Complex at INEEL. Approximately 95% of this waste is contaminated with Resource Conservation and Recovery Act (RCRA) hazardous waste, classifying it as "mixed waste." INEEL also is storing mixed low-level waste (which refers herein to mixed low-level waste other than alpha-contaminated mixed
